VILLAGE NURSERIES

Jos. H. Black, Son & Co.
HIGHTSTOWN, NEW JERSEY

Trees by Express or Freight.—The weight of trees and plants varies with sizes and varieties. When packed their average weight will be about as follows: Apple, Pear, Plum, Cherry and Peach trees, first-class, 150 lbs. per 100; second-class, 100 lbs. per 100; Grapes, Currants and Gooseberries, 2 yrs., 30 lbs. per 100; Blackberries and Red Raspberries, 10 lbs. per 100; Black Raspberries, 15 lbs. per 100; Strawberries, 40 lbs. per 100.

DISTANCE TO SET STOCK

Apples.	80x30 ft.	48 trees per acre
Pears, Std.	30x20 ft.	110 trees per acre
Pears, Dwf.	12x12 ft.	200 trees per acre
Peaches, Plums, Apricots.	18x18 ft.	135 trees per acre
Strong-Growing Cherries	20x20 ft.	110 trees per acre
Duke and Morello Cherries	16x16 ft.	170 trees per acre
Grapes.	10x16 ft.	275 vines per acre
Asparagus.	1x 6 ft.	4,340 plants per acre
Currants and Gooseberries.	2 x 4 ft.	5,450 bushels per acre
Raspberries, Blackberries.	3 x 6 ft.	2,420 plants per acre
Strawberries.	1 x 3 ft.	14,500 plants per acre

GUARANTEE AND CONDITIONS OF SALE

We have no connection whatever with any other nursery, and our responsibility extends only to persons purchasing direct from us. We also disclaim any responsibility for failure arising from defective planting, or from subsequent faulty treatment or cultivation, and we are not in any respect responsible for any loss or damage arising from any failure therefrom.

While we exercise the greatest care to have all trees, shrubs and plants sold by us true to name and free from disease, and hold ourselves prepared to replace, on proper proof, all that may prove to be otherwise, we do not give any warranty, expressed or implied, with respect to them, and all such goods are sold upon the express condition and understanding that in case any of them prove to be untrue to name, unhealthy or otherwise defective, we shall not be held responsible for a greater amount than the original price of the goods.

ADVICE TO CORRESPONDENTS

Address all letters, JOS. H. BLACK, SON & CO., (not to individuals)

HIGHTSTOWN, N. J.

Remit by Money Order on Hightstown, N. J., Registered Letter, Draft, or Express Money Order

Directions for Ordering.—Write your name and address plainly, never omitting to give Post Office address, County and State. No matter how often you write follow the above directions. Always state distinctly the size and grade of stock ordered, as per the grades given in this Catalogue. We cannot change the grades from those given. **Be sure to give directions how to ship, whether by Mail, Express or Freight.** When these conditions are not complied with, we shall use our own judgment and ship the way we think best. Keep correct copy of the order so that when the stock arrives you will know exactly whether or not you get that which you have ordered.

Prices in this Catalogue do away with all previous quotations. The prices are for the quantities named, but, fifty and five hundred will be supplied at hundred and thousand rates, respectively. In ordering small fruits, single plants of a variety cannot be supplied at ten rates. Payments invariably in advance. Goods sent by express C. O. D., only when one-half of the amount is sent with the order.

Packing.—All goods are packed free. Notwithstanding this fact, we use the utmost care and pack according to the distance and to our customer's best interest. Everything is labeled.

Shipping.—We deliver all goods free at Freight and Express office at Hightstown, after that they are out of our control and we are not responsible for them. State plainly to what point goods should be sent.

Claims.—All claims must be made immediately upon receipt of goods, at which time they will be carefully considered and adjusted.

Replacements.—With the kind of stock we send out there is none necessary unless the soil or the weather or transportation company is to blame and you cannot expect us to make good these kind of losses. The man who agrees to replace such losses either does not or charges you in the first place many times what replacement by us would cost.

Shipping Season.—Our packing season commences in the Fall at 20th of October, and lasts as long as safe to ship, and in the Spring about March 1st, and continues until about the 15th of May.

Plants and Trees by Mail.—We make a specialty of filling Mail orders, and we call your attention to the prices given in this Catalogue on goods sent by Mail, post-paid, to any part of the country. **Positively we cannot send any stock by Mail unless it is quoted on 4th cover page.**

Acknowledging Orders.—We acknowledge all orders when received, and if you do not hear from us after a reasonable length of time, please duplicate your order, stating how much money you sent, and how it was sent, and then, being sure to sign your name, giving Post Office, County, and State every time you write.

Note.—All quotations are for immediate acceptance, subject to stock being unsold. No Liability to attach to us where frost, drought or other casualties beyond our control prevent delivery of stock that may be contracted for.

APPLES

Never has the apple grower been surer of profits than at the present time. In past years it has been a game of chance with the greater chance of selling your crop to the "Still-house" for a couple of barrels of cider. Today, spraying and proper care of orchards, with modern methods of packing and marketing have revolutionized the whole industry. The great northwest taught us how and now greater east is, with its better quality and closer markets, threatening to be too apt a pupil to please the tutor.

We present herewith three plans that have appealed to us as the most practical. The first shows peaches and apples planted together with an equal number of each.

This plan may be varied by planting three peaches to one apple by substituting a peach for the small growing apple.

Those who prefer planting apples alone leave out the peaches. This distance varies according to soil. Sixteen feet seems far enough because the peaches will not crowd each other nor the apples as much as when peaches alone are planted. When the peaches come out it will leave the apples of large growing habits thirty-two feet apart and almost twenty-three feet from the small growing apples.

L.A.	P.	L.A.	P.	L.A.
□	×	□	×	□
P.	S.A.	P.	S.A.	P.
×	△	×	△	×
L.A.	P.	L.A.	P.	L.A.
□	×	□	×	□
×	△	×	△	×
□ 16 ft ×		22 $\frac{1}{2}$ ft		—
— 32 feet —				

Explanation—The rows are 16 feet apart. The L. A. are large growing apple trees. The S. A. are small growing varieties (or peaches if desired). The P. are peaches, if a mixed orchard is planted. Leave out P. if apples alone are wanted.

In starting an orchard the planter must begin right. He must have suitable ground and trees that are right.

As to distance apart for planting, the different varieties need more or less room according to their habits. Baldwins and Staymans are types of trees needing thirty-six feet spread while such kinds as Duchess and Transparent could do nicely with sixteen to twenty feet.

Prices on Apple Trees

Except Delicious (See Page 5)

	Each.	Per 10	Per 100
Extra fine, 2 year olds, 5 to 7 feet, 3-4 in. to 1 in. Caliper.	\$.25	\$2.00	\$12.00
First-class, 2 year olds, 4 to 6 feet, 5-8 in. Caliper.....	.20	1.50	10.00
Second-class, 2 year olds, 3 1-2 to 5 feet.....	.15	1.25	6.00

The extra grade is exceptionally fine.

Prices on one year old Apple Trees

2 to 3 ft., all varieties except Delicious and English Codling	.15	\$1.00	\$5.00
3 to 4 ft., all varieties except Delicious and English Codling	.20	1.50	8.00
4 feet and up, in the following list.....	.25	2.00	12.00

Smokehouse, Staymans, Rome Beauty, Baldwin, Wealthy, White O. Pippin, Sweet Bough, Grimes Golden, Northern Spy, Stark, Nero, R. I. Greening, McIntosh, Duchesse, Bellflower, Early Ripe.

SUMMER APPLES

Early Harvest.—Medium size, pale yellow, early, mild, excellent, subacid.

Early Strawberry.—Medium size, mostly covered with deep red, tender, melting, with a mild pleasant flavor. Tree moderately erect grower, and a good bearer.

Early Joe.—An early red apple, ripening just after Red Astrachan, less acid but not sweet. One of the finest eating apples ever grown.

Early Ripe.—Pale yellow, with gray dots; size medium, sub-acid; good market sort. Bears young and is a good seller.

Starr.—(*In one year only.*) A large apple, with yellowish smooth skin, marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy and of fine quality.

Gravenstein.—Large, bright yellow, roundish, splashed with red and orange.

Liveland Raspberry.—(*In one year 2 to 3 ft. only.*) A beautiful apple deeply marked with crimson stripes over a glossy white skin. Flesh white and of the finest quality. Size medium to large, trees are vigorous growers.

Nyack Pippin.—Large, yellow with blush, best quality for table use; valuable for market.

Red Astrachan.—Large, nearly covered with crimson, acid, very early.

Summer Pearmain.—Medium, oblong, red, flesh yellow, rich, juicy, tender and pleasant flavor.

Summer Rose.—Medium, round, striped and splashed with red, tender and delicious.

Sweet Bough.—Large, pale yellow, sweet, productive, valuable for market, early.

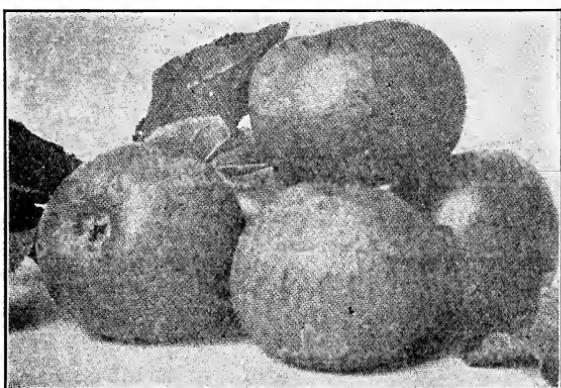

Yellow Transparent.—Medium, yellow, smooth, waxen surface.

Williams Early.—Medium to large; oblong, red, a handsome dessert apple. A very profitable market variety.

English Codling.—(*In one year olds only.*)—Very large, yellow with red cheek, handsome, sub-acid, good, productive, profitable; extra fine for cooking and market.

Prices on English Codling.	Each.	Per 10.	Per 100.
2 feet, one year.....	\$.20	\$1.50	\$10.00
3 to 4 feet, one year.....	.25	2.00	13.00

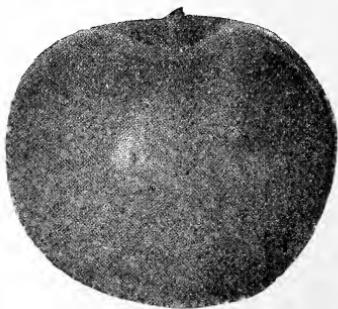

EARLY AUTUMN VARIETIES

**Duchess of Oldenburg**

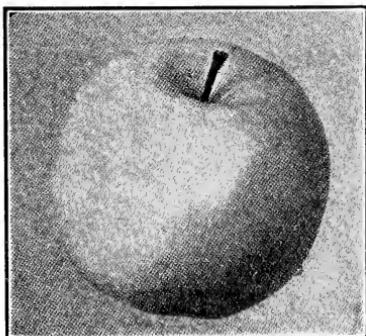

Maidens Blush.—Medium to large, roundish, clear yellow with pink cheek.

Ohio Nonpareil.—Fruit is enormous in size, one-half of each specimen bright red.

Wealthy.—Fruit medium to large, roundish, skin smooth, oily, mostly covered with dark red; flesh white, fine, juicy, vinous, sub-acid, very good. Tree very hardy, a free grower and productive. Bears fourth year and does well in all soils and climates. It ships well and holds up well.

**Wealthy**

LATE FALL AND WINTER VARIETIES

**Grimes Golden**

Grimes Golden.—Medium size, yellow, highest quality, rich, tender. Our most profitable late fall apple. It bears young and regularly. Its large crop of fine apples always commands good prices and the demand far exceeds the supply.

Hubbardston Non-Such.—Large, roundish, yellow, striped and splashed with red; very rich.

Jonathan.—Medium, deep red, tender, juicy and rich; one of the best apples for family and market.

King David.—A most beautiful rich, deep red shaded with a darker red. Of finest quality and if picked early is a good keeper.

King of Tompkins Co.—Very large and fine, red striped, sub-acid.

Duchess of Oldenburg.—A large, beautiful Russian apple; roundish; streaked red and yellow, tender, juicy and pleasant. A kitchen apple of best quality, and esteemed by many for dessert. Tree a vigorous fine grower, and a young and abundant bearer. Very profitable for market and thrives on all kinds of soil. We recommend it as a filler among larger and more spreading varieties.

Fall Pippin.—Very large, yellow, tender and best quality.

Mammoth Black Twig.—(Paragon)—Fruit large, roundish, somewhat flattened, color dark red, slightly streaked, flesh firm, yellow, crisp, aromatic, sub-acid and juicy. It is a very late keeper, rich and of excellent quality.

Baldwin.—Large, roundish, dark red, fine flavor, sub-acid, crisp and juicy. Very profitable in most sections.

Ben Davis.—Large, bright red, flesh white.

Fallowater.—Very large, greenish yellow, flesh fine grained, mild, sub-acid.

Gano.—Large, bright red, fine grained, tender, sub-acid, excellent bearer.

Mann.—Medium to large, deep yellow, juicy, mild, pleasant sub-acid.

McIntosh Red.—Medium size, nearly covered with dark red; flesh white, fine, very tender, juicy and refreshing. A good annual bearer of fair, handsome fruit. Resembles the Fameuse.

Moore's Sweet.—Red; sweet winter variety of highest quality; medium size

Nero.—Medium, red, good and regular bearer, good keeper, fine dessert apple.

Northern Spy.—Large, striped with dark crimson.

North Western Greening.—Medium, yellow, rich, extra good keeper.

Paradise Sweet.—Large, yellow, excellent.

Rhode Island Greening.—Large greenish yellow, tender, juicy.

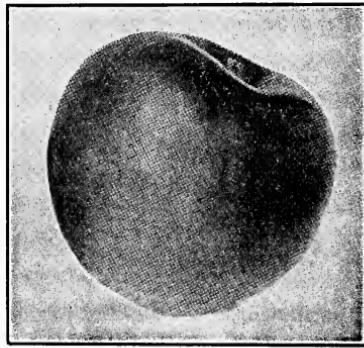

Rome Beauty.—Large, yellow, shaded with bright red, roundish, slightly elongated, a fine appearing apple which makes it a good seller and tree is a vigorous upright grower, with willowy twigs that spread when loaded with fruit. It begins to bear very young, a very profitable variety. One of the surest croppers and best keepers.

Smokehouse.—Large, shaded with bright red, firm, juicy and crisp, fine quality.

Stark.—Large, striped with red, flesh yellowish and moderately juicy. A splendid keeper and heavy cropper. Very profitable and satisfactory.

Delicious

Mammoth Black Twig

Delicious.—(See prices below.)—Trees that we offer of this variety are the true variety so much advertised. Buds were taken from bearing trees known to be right.

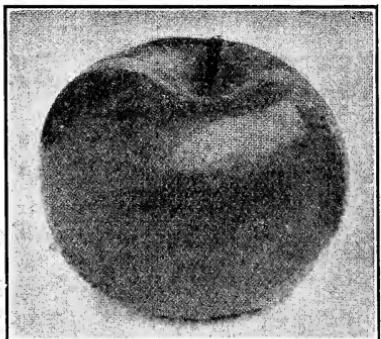

This variety is valuable particularly because of its fine flavor and color making it especially well suited for a dessert apple. As such it is without an equal and therefore retails for the highest prices. The color is bright crimson on the sunny side and yellow almost entirely overlaid with crimson on the other side, fruit is large, flesh is tender, quite crisp, mild in quality and while not sweet is sufficiently free from acid to give the most delicate stomach no trouble to digest. It is a splendid shipper and a good keeper.

Prices of Delicious

	Each.	Per 10.	Per 100
2 year, 5 to 6 feet.....	\$.30	\$2.50	\$20.00
2 year, medium, 4 to 5 feet.....	.25	2.00	15.00
1 year, 3 to 4 feet.....	.25	2.00	10.00
1 year, 2 to 3 feet.....	.20	1.50	8.00

Winter Banana.—Large, golden yellow with a red cheek, firm, fine grained and of best quality for eating and cooking. Late fall and early winter.

White Ohio Pippin.—Large, light yellowish green apple, a splendid keeper, quality good. Resembles Newtown Pippin but is larger.

Staymans Winesap

Winesap.—Medium, deep red, firm, crisp, fine quality, good keeper.

Wolf River.—Large, striped and splashed with red, juicy. A show apple of poor quality, but generally sells well because of its size.

Yellow Bellflower.—Large, yellow, rich, crisp, juicy, sprightly acid flavor.

York Imperial. (Johnsons Fine Winter.)—Medium to large, yellow, shaded red, firm, juicy, sub-acid. An excellent shipping apple.

DWARF APPLES

Dwarf Apples

Prices.

	Each.	Per 10.	Per 100.
1 year, 2 to 3 feet.....	\$.15	\$1.25	\$ 8.00
2 year, 3 to 4 feet.....	.20	1.50	10.00
3 year, 4 to 5 feet.....	.25	2.00	12.00

We can do them in the following varieties: Nyack, Rome Beauty, King David, Wolf River, M. B. Twig, Delicious, Winter Banana, Smokehouse, Jonathan, York Imperial, Grimes Golden, Baldwin, White O. Pippin, Northern Spy, Wine Sap, Duchess, Staymans Sweet, Summer Pearmain, Early Strawberry, Gano, Wealthy, Fall Pippin, Sweet Bough, Maidens Blush, McIntosh, Hubbardstons, Early Ripe, Yellow Transparent, Stark, Staymans, Hyslop Crab, Jonathan, Nero.

Staymans Winesap.—This apple should not be confused with the old Winesap. It is double the size and of much finer quality. In color, it is a dark red with faint stripings. A heavy young and annual bearer of the very best quality of fruit which pleases everyone and will keep. We consider it the best apple that we have ever grown for home use and market.

Sutton Beauty.—Medium, shaded, mottled and distinctly striped with crimson; flesh crisp, tender, juicy.

Smith Cider. (Salisbury.)—Large, skin yellow, changing to red, flesh tender, juicy, crisp, fair flavor.

Talman Sweet.—Yellow, firm, rich and very sweet.

The average standard apple tree can be depended on for good crops when eight to ten years old. If, when planting an orchard of standard trees, you set a dwarf tree midway between each two standard trees, they will not crowd each other for several years and you can gather apples from the dwarfs after the third or fourth year—or in other words, six to eight good crops before they need to be taken out.

When the standard trees commence to bear much the dwarfs should be removed.

We do not think the dwarf is valuable as a permanent tree in commercial orchards, but they appeal to the grower who wants some returns from his land before the standard trees begin to bear, provided he does not wish to plant peaches with his apples. The dwarf apple is particularly valuable for permanent planting in gardens, back yards, etc., where space is limited.

CRAB APPLES

Prices on Crab Apples same as standard sorts. Special prices on 100 lots.

Florence.—Medium, oblong, striped red and yellow, very beautiful, one of the best crabs.

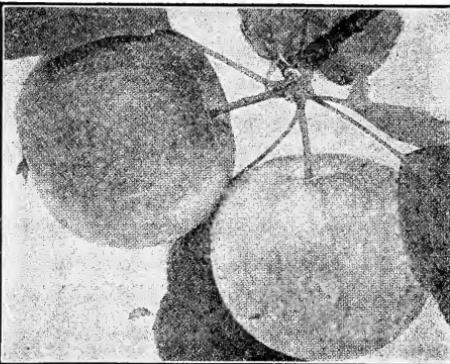

Hyslop.—Large, produced in clusters, roundish, dark, rich red.

Lady Elgin.—Similar in size and appearance to the Lady apple; flesh juicy and good, tender. An early and prolific bearer.

Martha.—The ground is a bright yellow, nearly overspread with bright red.

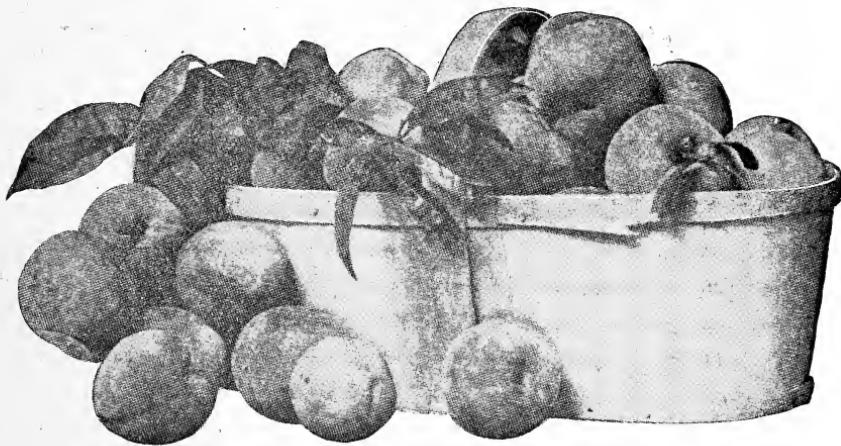

Transcendent.—Large, roundish, rich crimson, white bloom, flesh crisp.

Whitney's No. 20.—Large, almost red, striped; flesh yellowish white, very juicy, sub-acid, excellent. Tree vigorous.

Crab Apples

PEACHES

There is no crop grown that yields as good returns as a peach orchard.

During the past season all produce was very cheap and peaches were no exception, yet when they had been properly cared for and were in good condition they yielded better returns than other crops and showed a neat profit.

If you have a piece of ground that has good air and water drainage and are willing to give the trees as good care as you would corn you will find it pays much better than potatoes, corn, hay or grain.

N. B.—Our Experimental Station, having the best interests of all at heart, devoted considerable time and labor to testing out varieties and trees. They proved trees to be true to name and healthy and then offered stock from these trees to nurserymen. Appreciating the value of such stock we availed ourselves of the opportunity to have stock that was certified and ordered all that they would let us have. We used it solely to propagate from and at the present time are offering the following kinds grown exclusively from this source: Miss Lolo, Elberta, Carman, Champion, Crawfords Late, Belle of Georgia, Foxes Seedling, Arp Beauty, Crawfords Early and Edgemont.

The remainder of our list were budded from trees that are fruiting for the second time and show that they are true to name and healthy. Our orchard has been pronounced as the finest ever grown in this section and the quality of the fruit has commanded the highest market prices during the whole season.

Prices of Peach Trees

	Each.	Per 10	Per 100.
5 to 7 feet, 3-4 inch Caliper exceptionally fine.....	\$.30	\$3.00	\$12.00
4 to 6 feet, extra, 9-16 inch and up Caliper.....	.25	2.00	10.00
3 1-2 to 5 feet, first class 1-2 inch and up Caliper.....	.20	1.50	9.00
3 to 4 feet, medium.....	.15	1.25	8.00
2 to 3 feet, branched.....	.12	1.00	7.00

Per 1000—Special prices on application.

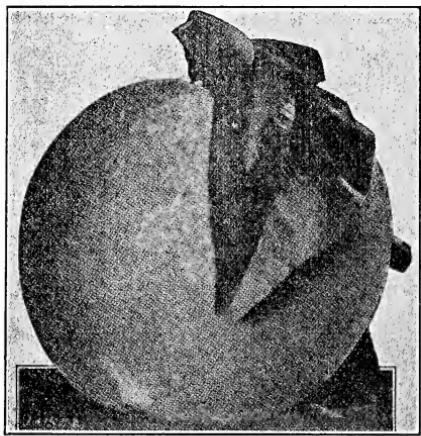

These are all one year old Buds and two year roots.

The list of varieties which follows is arranged in order of ripening as nearly as possible.

The letters after each variety denotes the color of the flesh. (Y) is yellow, (W) is white and (R) is white with more or less red or pink mixed through the flesh.

Varieties not otherwise described are freestones.

Mayflower. (R).—The very earliest of all peaches, it commands good prices in nearby markets. It is an early cropper, bearing regularly large crops of medium size peaches. In color it is red all over. Half cling.

Carman

disposed of our entire stock of it to personal friends who knew it.

It ripens about three days later than Carman, is about the same size and of much better quality. The tree is even hardier in bud than Carman. The New York Experimental Station reports as follows:—"The best peach of its season and one of the best of all." "It is of better quality, hardier and more productive than Carman. It is almost a perfect freestone."

The fruit is large, skin tough, flesh tender, juicy and of fine quality. Color is white with red cheek.

Present stock furnished by the New Jersey Experimental Station.

Hiley (Early Belle.) (R)—Seedling of Belle of Georgia; like its parent in size, color and beauty; ripens earlier; a large, rich, creamy white peach, with rich blush on sunny side; fine quality; good shipper.

Champion. (R)—One of the largest if not the very largest peach ever grown. Ripens just after Miss Lolo and with Hiley. Its season of ripening and its productiveness make it a valuable variety. Color is cream white with a red cheek, flesh is white with a slight yellowish tint and of the very finest quality.

Stock furnished by the New Jersey Experimental Station.

Arp Beauty. (Y)—Early, a fine yellow peach ripening five weeks before Elberta. Skin yellow with a beautiful blush; flesh yellow, juicy sweet, rich and of excellent quality; clings slightly.

Stock furnished by the New Jersey Experimental Station.

Mountain Rose. (R)—Very profitable for market, large, roundish, skin white, nearly covered with a rich red; flesh white, slightly stained at the stone, juicy, sweet.

Carman. (R)—This is the first peach of any value for market after Maules Early. It ripens at about the same time as Greensboro and Early Rivers, both which are too tender and likely to rot to be reliable. Carman is very hardy in both tree and bud. It is a regular and heavy cropper. Fruit is almost round, large to very large, of a creamy white color covered on one side with a deep rich blush. Skin tough, flesh tender, fine flavor and juicy. It is a splendid shipper and one of the most profitable peaches. Clings slightly. **Stock furnished by the New Jersey Experimental Station.**

Miss Lolo. (R)—(Spelled by some as "Lola.") This variety was secured by us from Texas under above spelling in 1897 and was fruited in 1900 and we have always considered it our very best peach for profit and for several years

Crawfords Early. (Y)—An old well known variety which does exceptionally well in some localities. Is hardy in bud and bears large crops of medium size peaches ripening with Mt. Rose and before Elberta.

Stock furnished by the New Jersey Experimental Station.

Niagara. (Y)—After two years of testing with other varieties we find this one of the best yellow varieties. On two year old trees we had a fair crop and three year trees bore a load of fine, high colored peaches. In quality it is equal to the best being sweet and juicy. It is almost entirely covered with a rich red. Ripens before Reeves Favorite or Elberta and is hardy in tree and bud.

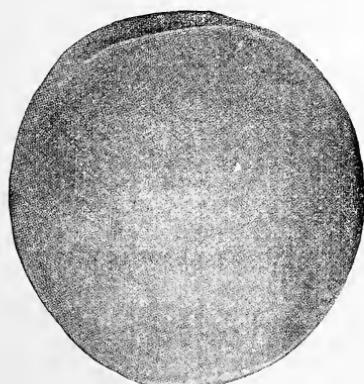

Old Mixon. (R)—Skin yellowish white with a deep red cheek, flesh white, but red at the stone, tender, rich, excellent.

Ray. (R)—When first introduced this variety was supposed to be an early peach but it ripens just a day or so before Belle of Georgia and unfortunately competes with that variety. It is a beautiful fruit, the coloring being of delicate tints rather than the bold markings of many sort. In shape it is ideal and the quality is good, also a yearly and good bearer.

Reeves Favorite. (Y)—Large, skin yellow, with fine red cheek, flesh yellow, red at stone, juicy and melting.

Early Elberta. (Y)—(Gold Finch.) (*In June Buds only*)—A more handsome peach than the Elberta. The yellow on shaded side is very bright and clean appearing. Ripens a few days ahead of Elberta and in most characteristics similar to that variety.

Prices—(June Buds only) 20c each; \$1.50 per 10; \$10.00 per 100.

Belle of Georgia

Belle of Georgia. (R)—The Elberta furnished a new type of early, regular and heavy bearing yellow peaches which has never been equalled for shipping and profit. The Belle of Georgia is just as distinctive in the white varieties. It is of large size, uniform in shape and very showy. Quality is good to excellent. It comes into bearing young and is very prolific and picks over an extended period, finishing up just as Elberta begins. **Stock furnished New Jersey Experimental Station.**

Elberta. (Y)—Very large, skin golden yellow and where exposed to the sun, faintly striped with red; flesh yellow, very fine grain, juicy rich, sweet and splendidly flavored; tree very prolific and presents a handsome appearance and a luxuriant growth. It is a perfect freestone and one of the most successful market varieties. Does well everywhere.

Stock furnished by New Jersey Experimental Station.

Stump. (R)—An old variety of considerable merit, it has stood the test of years. Many discussions have arisen over the true description of Stump but we give a description of the variety we have to offer under that name.

It is a round peach of large size with white skin nearly entirely overspread with a pink tint except on the sunny side which is red. It is of good quality, ripens through a long period beginning just after Elberta and where it does well is a profitable market peach.

Crawford Late. (Y)—Large, yellow with a red cheek; flesh deep yellow, juicy and melting. **Stock furnished by the New Jersey Experimental Station.**

Beers Late. (Y)—A seedling of Crawfords Late, with which it ripens and differs only in being more regular and abundant bearer.

Chairs Choice. (Y)—Very beautiful, large size, deep yellow with a red cheek, flesh firm and of best quality. Of all this type and season we have no yellow peach that equals it in size, uniform shape, coloring and productiveness. Ripens just after Elberta is gone and before Foxes Seedling begins.

Foxes Seedling. (R)—After Chairs Choice or Crawfords Late there is but one really good peach that comes before Iron Mountain. Foxes Seedling fills this gap of five or six days perfectly. It is a long lived tree and begins bearing on the 3rd or 4th year. It is a heavy cropper and about as hardy in bud as Champion. Fruit is rather longish and pointed having a white skin shaded with a bright red on the sunny cheek. Flesh is fairly juicy and one of the sweetest and best quality of all peaches. No orchard is complete without some Foxes.

Stock furnished by New Jersey Experimental Station.

Edgemont. (Y)—A late large yellow peach with a beautiful red cheek ripening after Alberta. Stock furnished by New Jersey Experimental Station.

Beers Smock. (Y)—Fruit medium large; skin light orange yellow mottled with red. Excellent as a late market sort.

Iron Mountain. (W)—The first time we saw this peach we were determined to have some of the stock. We procured it and in no year since that time have we been without peaches. For two years Maules Early and Iron Mountain were the only trees giving us any fruit. Upon its introduction many kinds were sent out under the name of Iron Mountain and some claimed it was Brays Rareripe, others that it was Fords Late, all of which was detrimental to the reputation of the true variety. We have made more money per tree from it than from any other variety and although its lack of high coloring is slightly against it yet it is becoming so well known for its productiveness, hardiness, keeping and eating qualities that it is a close rival in reputation to Belle of Georgia and Alberta. For New Jersey and Pennsylvania it is a most profitable peach and always has been. It is the best canning peach that we have ever tested. In size it is very large, is oblong in shape and pure white in color except when slightly tinted with red and ripens just before frost comes. **Stock our own grown and absolutely true.**

Salway. (Y)—Large, yellow mottled with a red cheek; a valuable late variety. Finest of its season in section where it succeeds.

CHERRIES

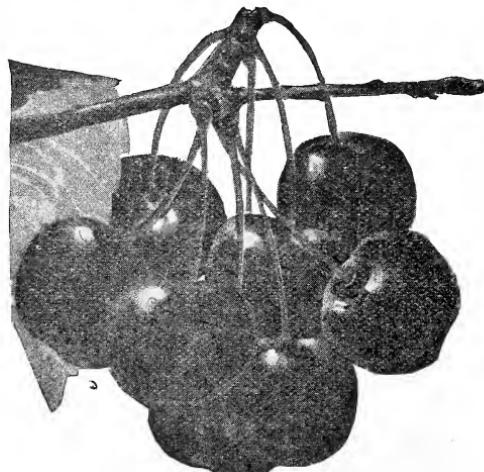

HEARTS AND BIGARREAUS, OR SWEET CHERRIES. ON MAZZARD STOCK

Not only are the sweet cherries delicious, but they are profitable if you have large matured trees. Ninety-nine per cent. of the sweet cherries planted fail to mature because they are not budded on the right kind of stock. Years ago when Mazzard stocks were used exclusively no such trouble was experienced. We find but few nurseries use this stock today which accounts for the loss.

In the future we shall use nothing else and while our prices will be higher, there is no comparison otherwise.

Prices on Sweet Cherries

On Mazzard Stock.	Each.	Per 10.
Prices, (except Mercer) extra large 2 year.....	\$.50	\$4.50

Mercer

Black Tartarian.—An old and popular variety; large, purplish black, juicy, rich, excellent; early.

Gov. Wood.—Large, roundish, depressed at stem; skin light yellow, shaded and marbled with bright red; flesh tender, juicy, sweet and delicious; early.

Mercer.—The fruit buds are hardier than any other variety of heart cherries, thus insuring annual crops. Fruit, very large often measuring three-quarters of an inch in diameter; color, dark glossy red, almost black when fully ripe, having the appearance of being varnished; quality unexcelled for table use or canning; ripens early.

Price, 50c each, \$5 for 10.

Napoleon.—Very large, pale yellow or red; firm, juicy and sweet. A vigorous grower and very productive; one of the best.

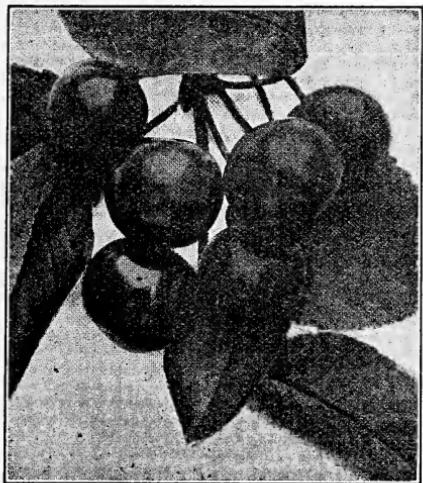

Rockport.—Large, pale amber with clear red, very handsome and excellent. Good bearer; early.

**DUKES AND MORELOS,
OR SOUR CHERRIES**

Among the Sour cherries such varieties as Richmond and Montmorency have been planted heavily for years and the returns of course warranted it. There are needs for our entire list but we wish to call your attention to the Louis Phillippe as the best canning cherry ever offered. It bears young and very abundantly and when cooked holds its flavor and loses a large part of the acidity.

Prices of Sour Cherries.

	Each	Per 10	Per 100
All varieties 2 yr., extra.....	\$.35	\$3.25	\$30.00
3 1-2 ft. 1st class (Richmond & Montmorency only).....	.30	2.75	25.00

Louis Phillippe

Large Montmorency.—A large rich, acid cherry, larger than Early Richmond, and fully ten days later.

Olivet.—A variety of French origin. Large, globular, very shiny, deep red sort; flesh red, tender, rich and sub-acid

May Duke.—Large, dark red, juicy and rich; an old, excellent variety. Productive; early.

Dyehouse.—Resembles both the Duke and Morello in wood and fruit; early and sure bearer; ripens before Early Richmond; better and more productive.

English Morello.—Medium to large; blackish red, rich, acid, juicy and good. very productive. Very late.

Early Richmond.—Medium size; dark red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is unsurpassed for cooking purposes, and is exceedingly productive.

Louis Phillippe.—A large prolific dark red cherry ripening just after Montmorency. Very mildly sub-acid when cooked. The best canning cherry offered.

acid cherry, larger than Early Richmond,

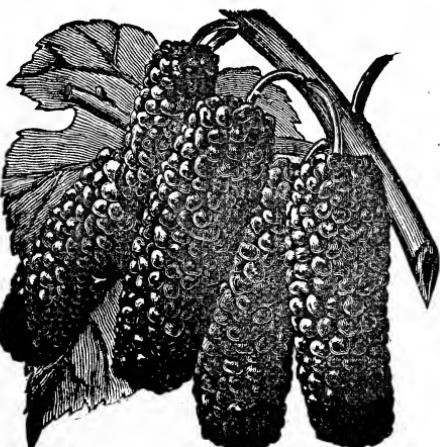

MULBERRIES.

Price.—4 to 6 ft., 30c each; \$2.50 per 10.

2 to 4 ft., 20c each; \$1.50 per 10.

New American.—Equal to Downing in all respects and a much hardier tree. Vigorous grower, very productive, the best variety of fruit, ripe from middle of June to middle of September.

Downing Everbearing.—Highly ornamental for street or lawn, yielding an abundant supply of very large, black, handsome berries, sweet, rich and excellent.

Downing Everbearing

PEARS.

The planting of this fruit has been neglected for many years past and now we find a shortage in supply and consequent high prices. Such varieties as Clapp's Favorite Bartlett and the much abused Keiffer have been good money makers in the past and will continue to be. The Keiffer on the light, sandy or gravelly soil will give better returns in profits than any other crop. Severe pruning and thinning and proper care of the fruit being the only requirements beyond very ordinary cultivation and fertilizing.

Prices on Pears Except Keiffer.

	Each.	Per 10	Per 100
3-4 inch caliper, 5 to 7 feet.....	\$.35	\$3.25	\$30.00

Dwarf varieties 2 year, marked *	.25	2.00	15.00

SUMMER PEARS

***Bartlett.** — Large, yellow, flesh white, exceedingly fine grained and buttery.

***Clapp's Favorite.** — Very large, yellowish green to full yellow, marbled with dull red, vinous, melting and rich.

Wilder. — Is one of the earliest; fruit medium, bell-shaped, pale yellow with deep shading of brownish carmine, with numerous small dots; fine grained.

AUTUMN AND WINTER PEARS

***Beurre d'Anjou.** — Large, greenish, sprinkled with russet, flesh melting, with a high, rich, vinous, excellent flavor, productive, succeeds well as a dwarf.

***Duchess de Angouleme.** — Very large, dull greenish yellow, streaked and spotted with russet, flesh white, buttery and very juicy, with a rich and very excellent flavor; on the young standard trees the fruit is variable, but as a dwarf it is always fine

Howell. — Large, light, waxen yellow, with a fine red cheek; handsome, rich, sweet.

Keiffer. — Fruit large to very large, skin yellow, with a bright vermillion cheek; flesh brittle, very juicy, quality good.

Prices.

	Each.	Per 10	Per 100

5 to 6 feet.....	.20	1.50	10.00
3 to 5 feet.....	.15	1.25	8.00

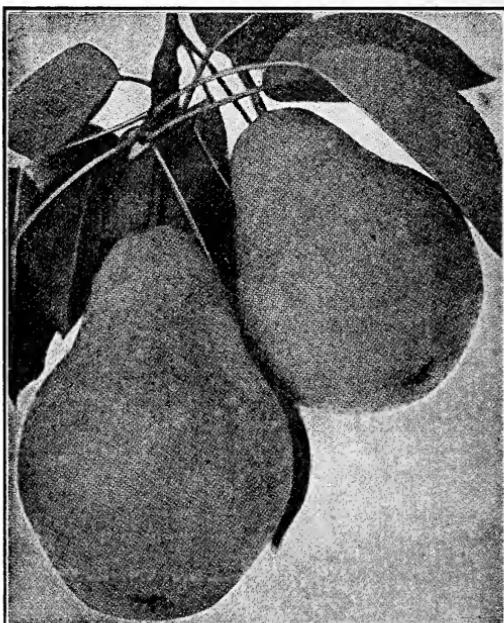

Lawrence. — Medium, yellow, covered with brown dots, flesh white with very much aromatic flavor.

***Seckel.** — Small, rich, yellowish, one of the best and most highly flavored pears known. Best of all pears.

Sheldon. — Large, russet, juicy, and excellent, one of the best varieties, a fine grower and productive.

Vermont Beauty. — Tree hardy and vigorous, early and abundant bearer. Fruit medium size, yellow with red cheek, rich, juicy, best quality.

Worden-Seckel. — A seedling of the Seckel. Equal in quality to its famous parent, which it resembles much in flavor, while in size, color, form and appearance, it is decidedly superior.

Bartlett

Keiffer.

PLUMS

The past two years have proven beyond a doubt that there is good money to be made from plums. Scale, borers, curculio and rot discouraged planters for some years but spraying has overcome all these troubles except the borer which attacked trees budded on peach and Mariana plum. Our trees are budded on Myrabolan trees which are not injured by the borer and is hardier than the other stocks.

EUROPEAN PLUMS

	Each.	Per 100.
Prices. —2 year, 4 to 6 feet, extra fine.....	\$.40	\$3.00

German Prune.—Fruit oval in shape, nearly two inches long, of good quality for the table, and much esteemed for drying and preserving, hangs long on the tree and is firm, sweet and pleasant.

Grand Duke.—A very handsome plum especially valuable for market. It resembles Bradshaw in size and color, being very large and of fine dark violet red.

Green Gage.—Small, considered the standard of excellence. Mid-season.

Reine Claude.—A large fine variety, skin greenish yellow covered with a thick bloom, flesh yellow, juicy, melting, with a rich sugary, excellent flavor.

Tennant Prune.—Large, dark purple with blue bloom, rich, delicious, hardy and productive.

Moore's Arctic.—Size medium; skin purplish black, with a thin blue bloom; flesh greenish yellow, juicy, sweet.

Imperial Gage.—Rather large, oval greenish; flesh juicy, rich and delicious, and on account of the tree being a good grower, is preferred by many to the Green Gage, but ripens early.

Shropshire Damson.—A medium size, dark purple variety; esteemed for preserving. Very productive and ripens late.

Lombard.—Oval; violet-red; flesh yellow, juicy and pleasant; a great bearer. September.

JAPAN PLUMS

	Each	Per 10	Per 100
Prices. —2 year extra large.....	\$.35	\$3.00	\$22.00

Abundance.—Beautiful lemon yellow nearly overspread with bright cherry, oblong, flesh orange yellow, melting, rich and highly perfumed. Abundant and unusual bearer.

Burbank.—The fruit is large, nearly globular, cherry red, flesh a deep yellow, with a peculiar and agreeable flavor.

October Purple.—The fruit is round in form, color a reddish purple a little darker than the Bradshaw, flesh yellow, stone small, and in quality superb.

Red June.—Of value for its very early ripening. The fruit is medium to large, roundish conical, deep purplish red, very handsome and attractive; flesh pale yellow firm and meaty.

Shiro.—Fruit is medium to large, very uniform in size, clear light yellow, with thin white bloom, flesh firm yet juicy, rich, pleasant, sub-acid, ripens two weeks before the Burbank.

APRICOTS.

We have some demand for this delicious fruit and while it does not fruit in some sections, in others it bears crops that are much appreciated.

Because of its early blooming it should be put on the north side of hedges or buildings to keep it back as much as possible.

Prices.—4 to 5 feet, 50c each; \$4.00 per 10.

2 to 3 feet, 35c each; \$3.00 per 10.

Alexis.—Large yellow with red cheek slightly acid, rich and luscious.

Alexander.—Large oblong, yellow flecked with red, sweet and delicate.

Budd.—Large, white with red cheek, sweet and juicy. Extra fine, a very late variety.

Gibb.—Medium size, yellow slightly acid but very rich and juicy. Ripens very early.

Harris.—Large, rich, golden yellow, one of the hardest.

Moorpark.—One of the largest and finest, yellow with red cheek, flesh juicy and rich, very productive.

NUTS

PECANS; BUDDED VARIETIES

Members of the Northern Nut Growers Association have, for years, been suggesting the propagation of hardy Pecans. The drawback has been the difficulty in procuring buds from any desirable sorts and after they were found the difficulty of successful budding or grafting. Both of these troubles have been overcome and now we are able to offer you several varieties.

Our stock is so much better than we had ever hoped to offer that it is with the greatest pride we ask for your trade.

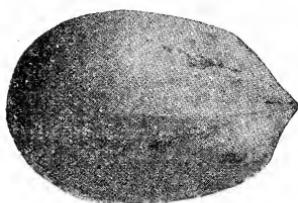

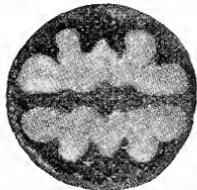

These Pecans tree are among the hardiest and most beautiful ornamental trees. The nuts of these hardy varieties are equal to the very best of the southern and far superior to the average.

The trees we offer are one year old from the bud and are three feet high and have a large long root. The first year after they are transplanted they will not make any growth but when once established they grow very rapidly. They do well in almost any kind of soil that is well drained. They begin fruiting very young.

Our list of Hardy Northern Pecans Includes:

Busseron.—This is one of the best of the Indiana varieties, it is an exceptionally heavy annual cropper. The original tree has a most excellent record, bearing a very large crop of the finest nuts every year. The nut is large, of good quality and fine appearance.

Price.—Budded trees, 3 feet high, \$2.25 each.

Butterick.

Indiana.—This name is rather confused because it is often given to promiscuous seedlings grown from any of the small nuts procured from trees growing in the state of that name. The name should apply only to this specific variety which is supposed to be a seedling of Busseron and resembles it somewhat. Like its parent it is a wonderful cropper. The nut is large, soft shell and cracks well. The quality is of the best.

Price.—Budded trees, 3 feet high, \$2.50 each.

Kentucky.—By some people this variety is considered superior to all the others. The tree is about best grower of them all and in quality the nuts are equal to the Green River and somewhat larger. It is a thin shell and the meat comes out nicely. We recommend it both for home and commercial use.

Price.—Budded trees, 3 feet high, at \$2.00 each.

Major.—This will be one of the very best for candy-making as the kernels come out perfectly and are plump, regular and attractive. The shell is soft and the meat is rich and of the highest quality. The

Butterick.—This is from Illinois and the original tree bears heavily every year and even in the worst year matured 350 lbs. of nuts. The nut is very large and the shell is very thin. It cracks easily and is really a paper shell variety. The tree is very vigorous and productive and bears young. The kernel is of the finest quality and comes out of the shell perfectly.

For both commercial and home plantings we recommend it unreservedly.

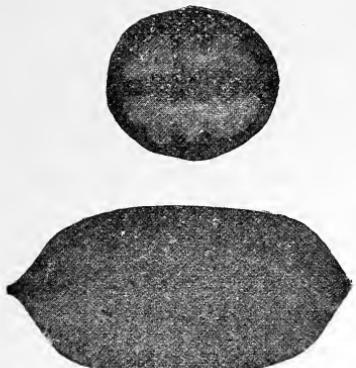

Price.—Budded trees, 3 feet high, \$2.25 each.

Green River.—For home use we consider this the most desirable with the possible exception of Kentucky. The tree is very thrifty, hardy and a good bearer. The nut is medium to large as compared with the best cultivated varieties. It is a true paper shell. The meat comes from the shell perfectly and stands second to none for quality and appearance.

Price.—Budded trees, 3 feet high, \$2.00 each.

Green River.

Indiana.

tree is a good grower and very ornamental. The nut is of medium size but it is full of good eats. For confectioners and home use it will be a great favorite.

Price.—Budded trees, 3 feet high, \$2.00 each.

Warrick.—This is another variety from Indiana but from a different county after which it is named. The original tree is of very large size and has a fine record of crops. The nuts are very large and of fine form, they are light in color, and very regular in size. A prominent member of the Northern Nut Growers Association and a Pecan enthusiast recommends it very highly.

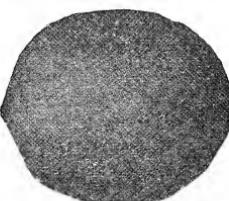

Price.—Budded trees, 3 to 4 feet, \$2.25 each.

SPECIAL OFFERS

Because of the cost of packing for which we make no charge we can not sell singles trees for less money than quoted.

We can pack three trees as cheaply as we can one and six trees at but a small additional price. Therefore we quote these specials:

1 each of Green River, Kentucky and Major or 3 of one of these kinds.....	\$5.00
2 each of Green River, or Kentucky and Major or 6 of one of these kinds.....	\$9.50
1 of either Green River, Kentucky or Major and 2 of any other; 3 trees in all.....	\$6.00
2 of either Green River, Kentucky or Major and 1 of any other; 3 trees in all.....	\$5.25
1 of each of the 7 kinds.....	\$12.50
1 tree of any kind with an order for other trees at 25c less than regular price.	

Major.

HARDY INDIANA PECAN SEEDLINGS

These are hardy little trees that will stand the cold as well as the apple and will bear thin shell nuts of the very best quality but their size averages much less than the budded varieties. They are transplanted stock and will stand moving.

	Each.	Per 10.	Per 100.
12 to 18 inches, transplanted.....	\$.25	\$2.00	\$15.00
12 inch, by mail postpaid.....	.30	2.50	

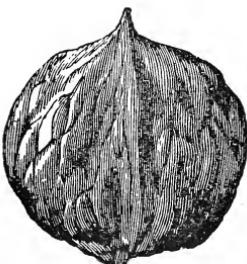

Hickory, Shellbark or Shagbark.—To our taste no other nut that grows, either foreign or native, is superior to this in quality. It possesses a peculiar, rich, nutty flavor, excelled by none. The tree is of sturdy, lofty growth. There is a great demand for this tree because of its nuts and also for an ornamental tree. We offer you this year some transplanted stock that we know will please.

Prices	Each.	Per 10.

6 to 12 inches, 2 yr. transplanted.....	.15	1.25

Chinquapin.—A shrub bearing a nut very much resembling a small chestnut. Sweet and delicious.

Price.—10 to 12 inches, 60c each.

Hickory, Shellbark, or
Shagbark.

OTHER NUT TREES

Chinese Walnut.—A type of the *Juglans Regia*, is the hardest of all soft-shelled walnuts, and stands several degrees below zero without injury: It is a vigorous tree grower and transplants readily, very prolific and comes to fruiting young. The nut is large, the kernel full, plump, meaty, sweet, rich in oils and of fine flavor.

Price.—15 to 18 inches, 25c each.

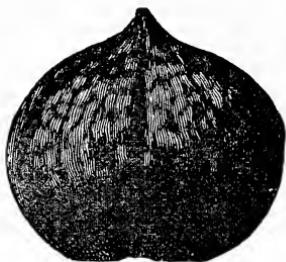

English Walnut.—Sometimes called French or Persian Walnut or Madera Nut. The tree is of fine spreading habit, making it available for shade. Every poultry raiser should use it in preference to other trees as it gives the desired shade and at the same time produces a crop that cannot be eaten or damaged by fowls. The nut needs no description; everyone is glad to get some to eat. The trees we offer are northern grown from northern seed and will bear great quantities of nuts when matured, these nuts will not be as bright in color as those offered at the stores because they have not been cleaned and polished but the quality will be better.

Japan Walnut, (Heart Nut.)

Japan Walnut, (Heart Nut.)—The trees grow with great vigor, assuming a very handsome form, mature early, bear young. The leaves are of immense size and of a charming shade of green. The nuts, which are produced in extreme abundance, grow in clusters, and resemble Shellbark Hickory. As a dessert nut it has few superiors. The kernels are of a peculiar heart-shaped which can be readily extracted whole. The meat is very sweet and is used very extensively in the form of candied nuts.

Prices.	Each.	Per 10.	Per 100.

GRASSES

Eulalia Gracillima.—Narrow green leaves with a silvery white mid-rib. For center of vases, as well as making an attractive lawn plant; perfectly hardy.

Price.—15c each; \$1.00 per 10.

QUINCES.

The Quince requires a deep, rich, moist soil, but if well manured and mulched, they will succeed admirably upon dry ground. The tree is hardy and compact in growth—requiring but little space, productive and comes early into market. Prune off all dead or surplus branches and thin out the fruit bearing too freely.

Prices	Each	Per 10.
4 feet, extra fine.....	\$.35	\$3.00
3 feet.....	.30	2.50
2 to 3 feet.....	.25	2.25

Bourgeat.—Strong grower, prolific, hardy. Fruit large, smooth and fine grained.

Champion.—Fruit very large, fair and handsome. Tree very productive, surpassing any other in this respect; bears abundantly while young, flesh cooks as tender as the apple, and without hard spots or cores, flavor delicate, imparting an excellent quince taste and odor to any fruit with which it is cooked.

Meeches Prolific.—A vigorous grower and immensely productive, frequently bearing fruit when but two years of age, increasing in quantity yearly to such an extent as to require vigorous thinning to prevent injury to the trees from overbearing. The fruit is large, lively orange color, of great beauty and delightful fragrance; its cooking qualities are unsurpassed.

Rae's Mammoth

Orange.—Large, roundish, bright golden yellow, cooks tender, and is of very excellent flavor. Valuable for preserves or flavoring, very productive, the most popular and extensively cultivated of the old varieties.

Rae's Mammoth.—A superb fruit; much larger than the Orange, but of the same form and color. Tree healthy; very thrifty grower. Productive.

STRAWBERRIES.

SUPERB EVERBEARING

Superb.—(Perfect Bloom.)—Considered the best of the fall bearing sorts. Berry glossy, very attractive and of the finest flavor. Berry is very large and firm. Brings every blossom to maturity. Until recently most of the fall-bearing varieties have been poor plant-makers, and it has been difficult to propagate them in any quantity. Superb, however, will make as fine a bed of plants as Sample. Superb will yield as much fruit in the fall as the average spring-bearing varieties do in May. With a good bed of this variety it is entirely possible to have strawberries every day from the time the first ripe berries come in the spring until they are cut off by the first heavy frost in the fall and you get a crop the same season you plant.

Prices.—50c per 12; 75c per 25; \$1.50 per 100; \$12.00 per 1000.

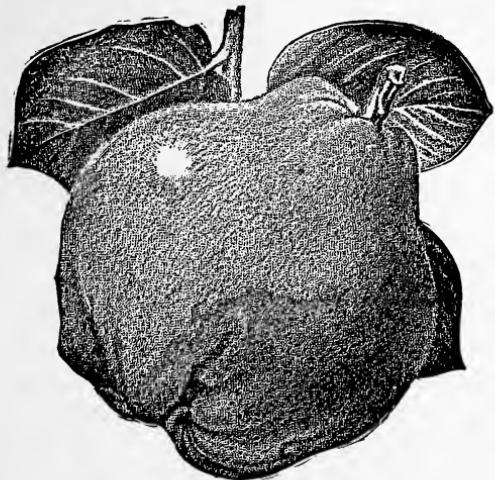

GENERAL LIST OF STRAWBERRIES

We quote in 25's instead of dozens because we have them all tied 26 to a bunch and it is not asking too much when we ask you to buy no less than 25 of a kind.

Prices.—(For Spring Delivery Only.)—40c per 25; 75c per 100; \$5.00 per 1000 unless otherwise noted. 10,000 for \$40.00.

Chesapeake.—(Perfect Bloom.)—Late. The fruit is very regular in shape, round, and of most attractive appearance; the quality is good to very good, flesh is firm and fine grained.

Price.—\$5.50 per 1000.

Aroma.—(Perfect Bloom.)—A late and very popular berry for all sections. A splendid strong blooming variety to plant beside imperfect blooming sorts. Plant strong, fruit large, uniform and of good color. A splendid market berry.

Gandy.—(Perfect Bloom.)—The berries are large, very uniform, of bright crimson color, handsome and showy, firm and of good quality. Requires good soil and culture.

Glen Mary.—(Perfect Bloom.)—One of the most popular sorts, it has become a standard. Foliage is good, berries are large, dark rich red with prominent bright yellow seeds. They are firm and of fine quality, being rich and juicy and a very pleasing flavor. For the fancy market it is only excelled by the Joe.

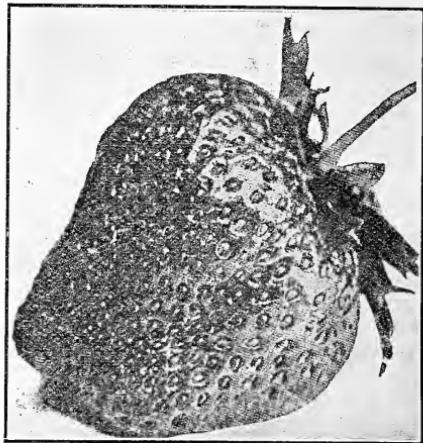

Joe. (Perfect Bloom.)—**Renamed Big Joe and Joe Johnson** and called a new variety, and while Big Joe really is a fitting name because of its size, Joe Johnson is not, as it was really Joe Black. It is another tribute to this fine variety, to consider it worthy of **two reintroductions** after its first appearance fifteen years ago.

Season medium to late. Plant is unusually vigorous and long lived, and foliage is clean and healthy. Productive, and carries its fruit well.

Fruit large to very large, and continues large to the end of the season, firm; in form it is obtuse conical and very uniform in size; red with red flesh; quality good.

Marshall. (Perfect Bloom.)—a very high quality berry particularly adapted to a fancy home trade. Very large and of a bright color, which, with its size commands good prices and a ready sale.

Nettie. (Imperfect Bloom.)—The largest and latest strawberry that we have ever fruited. It combines with the valuable quality the productiveness of Bubach, and the vigor of plant so prominently in Sharpless. Plant and foliage exceptionally strong, vigorous, and healthy; flower imperfect; enormously productive; berries very large, bright red. Ripens very late. Price, \$6.00 per 1000.

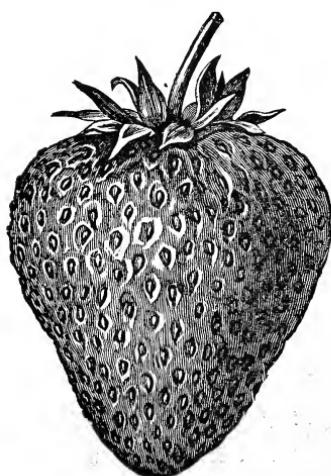

**Joe, or Joe Black, or Big Joe
(Incorrectly renamed Joe Johnson)**

Sample. (Imperfect Bloom.)—The plant is a strong, vigorous grower, very productive, texture firm, making an excellent shipper. The berries color all over at once, and look very pretty in the package. Large size, mid-season, fine quality, conical shape and regular in form; one of the best for the market.

Saunders. (Perfect Bloom.)—An excellent variety and like Joe, succeeds better than any sorts on light sandy soils. Berries are large and of dark glossy red, very firm and of high quality. Plants strong and thrifty, with good foliage and good croppers.

Senator Dunlap. (Perfect Bloom.)—Season early to mid-season. The plant is all that can be desired in a strawberry, vigorous, healthy, productive, almost rust proof and apparently well nigh drought proof. The fruit is of good size, regular and attractive in form, deep red in color without and within, firm in substance and excellent in quality.

Sharpless. (Perfect Bloom.)—An old variety popular because of its size and sweetness. It is very large and the plants are healthier than all others with the possible exception of Joe.

Sample

Rewastico. (Perfect Bloom.)—A large, high quality, bright cardinal colored berry, which is very regular in form. The foliage is fine, strong and clean. The plant is strong and vigorous and very productive. Rewastico is claimed to equal Chesapeake in every way and is a much better plant maker.

Stevens Late Champion. (Perfect Bloom.)—Plant a strong, vigorous grower, flower perfect. Berry, size and shape of Sharpless. Color, bright red; flesh firm and of the best quality. Productive.

Success. (Perfect Bloom.)—Early, large, firm, bright crimson. It is the best early variety that we have ever fruited, being very early and prolific. The plant is exceptionally vigorous and strong.

Wm. Belt. (Perfect Bloom.)—Next to Joe we consider this the best flavored of all strawberries. Like Joe it has increased in favor with years and while its foliage has not always been the best, there seems to be a continued improvement each year. If you desire fancy berries for home use or market, this variety should be included in your plantings.

RASPBERRIES.

Cuthbert.

bordering on purple; adhere firmly to the stem, and will dry on the bush if not picked; of rich sprightly flavor, the best for canning or evaporating, and probably the most productive of all raspberries.

Price.—10c each; 50c per 10; \$1.50 per 100; \$12.00 per 1000.

King.—The earliest raspberry. Professor Van Deman describes it: "Round, medium size; light crimson color; moderately firm and of excellent quality; a seedling of Thompson and ripens about the same time, but larger and more productive.

Price.—10c each; 35c per 10; \$1.50 per 100; \$12.00 per 1000.

Gregg.—Canes of strong vigorous growth and, under good culture, very productive. Berries very large, covered with heavy bloom, firm, meaty and of fine flavor.

Price.—35c per 10; \$1.25 per 100; \$10.00 per 1000.

Cuthbert. (Red.)—A strong grower and productive; very large, bright red; fruit firm, of very fine quality, season medium to very late; a good one for market or home use.

Price.—35c per 10; \$1.25 per 100; \$11.00 per 1000.

Scarff. (Black.)—A valuable new variety. In size it equals Cumberland. It makes a large number of strong canes that are clean and free of rust. Being very resistant to drought and disease in production it is beyond anything we have yet tried.

Price.—50c per 10; \$2.50 per 100.

Kansas. (Black.)—The fruit is handsome, firm and of fine quality. Canes are strong, hardy and prolific, with clean foliage.

Price.—35c per 10; \$1.25 per 100.

Columbian. (Purple.)—A most vigorous grower, thus enabling it to resist drought. It propagates from the tips and never suckers from the roots. It is very hardy. Fruit very large, often an inch in diameter; color dark red

Scarff

St. Regis or Ranere.—It has been called everybearing by some but it hardly bears that out, although it comes nearer it than any other we ever saw. Its principal value lies in its first crop which is equal to any and better than many.

The other crop is on the young wood and runs for quite a time and the berries are large and of fine quality. It bears the first season.

It is worth the prices we are offering it for as a regular one crop variety.

Price.—10c each; 60c per 10; \$1.50 per 100; \$12.00 per 1000.

Transplants 15c each; 75c per 10; \$2.00 per 100.

Plum Farmer.—Plants are hardy, vigorous and productive; the berries large, good in color and quality. It has already been grown in many localities and reports of its behavior are very favorable. The berries ripen very early and most of the crop is produced in one week. The fruit is very large, thick meated and firm, making a good berry to ship to distant markets. A Blackcap.

Price.—40c per 10; \$1.50 per 100; \$12.00 per 1000.

Cumberland. (Black)—Strong grower, productive, large berries, quality good, ripens in mid-season, and it should be tried by every fruit grower.

Price.—50c per 10; \$1.50 per 100; \$12.00 per 1000.

Black Diamond. (Black)—Strong vigorous canes, with numerous side branches, all thickly set with fruit spurs. Berries about the size of Gregg. Ripens early, fine flavor. The sweetest berry known.

Price.—50c per 10; \$1.60 per 100; \$13.00 per 1000.

BLACKBERRIES.

McDonald. (Imperfect Blossom.)—Plant every 3rd or 4th row with Dallas or Lucretia. **The earliest of all Blackberries.**

Prof. L. R. Johnson says:—"I feel, that in the McDonald there has arisen the greatest of the blackberry family." The McDonald is three weeks ahead of Eldorado, equaling it in every other particular, it surpasses in quality and size. The berries are very large, longish and uniform in size. In quality it is equal to any variety of any season. The plants are extremely vigorous, bearing immense crops, one man harvested 500 bushels per acre. It stands the dry weather perfectly and holds its foliage perfectly. It will hang on the bushes for several days after ripening. The earliness, size, fine quality command for it higher prices than can be had from others. It is as hardy as most blackberries and will stand colder weather than Early King, Early Harvest, Lucretia and Ward and in fact will stand as much cold as the peach tree. The plants will trail during the first year but become upright afterward. For market we know of no berry that will pay as well. For home use it extends the season being at least a week earlier than Lucretia Dewberry.

Prices.—50c per 10; \$2.50 per 100; \$20.00 per 1000.

10 McDonald and 3 Dallas for.....\$.60

100 McDonald and 25 Dallas for.....3.00

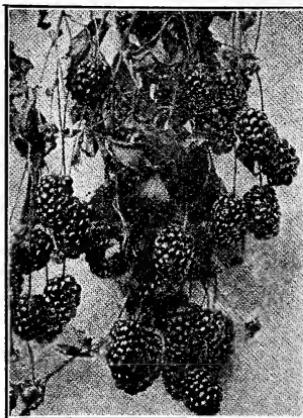

800 McDonald and 200 Dallas for.....20.00

Dallas.—Another very early blackberry following McDonald but blooms at same time and therefore is valuable to fertilize that variety. It is very vigorous grower with drooping and thorny vines that produce large crops of big berries of high quality. It has proven to be a good market variety.

Price.—50c per 10; \$2.00 per 100.

St. Regis

McDonald

Eldorado.—The vines are very vigorous and hardy. The berries are large jet black, borne in large clusters, and ripens well together, they are very sweet, melting and pleasing to the taste, have kept eight or ten days after picking with quality unimpaired.

Price.—35c per 10; \$1.50 per 100; \$12.00 per 1000.

Mersereau.—This is a very large, oval berry and does not turn red after it is picked; flesh sweet, melting, rich, very best quality. Bush strong, vigorous, extra hardy and resistant to disease. It is a most profitable blackberry.

Price.—40c per 10; \$1.50 per 100.

Ward.—Blossom perfect, never showing a sign of doubling. Fruit immense in size, jet black in color, very firm, tender and melting, without core, and of the highest quality.

Price.—40c per 10; \$2.00 per 100; \$12.50 per 1000.

Blowers.—A mammoth grower and enormously productive. Berries big and luscious. An iron-clad variety that never winter-kills.

Price.—40c per 10; \$2.00 per 100.

Rathbun.—Plant vigorous and productive, withstands drought well. Fruit large and handsome, without any hard core. Juicy and of high quality.

Price.—35c per 10; \$1.50 per 100; \$12.50 per 1000.

Lucretia Dewberry.—The fruit, which ripens before blackberries, is often one and one-half inches long by one inch in diameter, sweet and luscious throughout without any hard center or core.

Price.—40c per 10; \$1.25 per 100.

GRAPES.

If you want prices by the 100 or 1000 write us for quotations.

This fruit is a general favorite and the housewife can always find use for it in making jams, jellies and grape juice. It will grow wherever it gets the sun for at least half the day. It takes up but little space and requires no care but pruning once each year.

For an outlay of from \$1.00 to \$2.00 you can have all the grapes you can use in from three to four years time. In planting grapes do not set them deeper than the top of the old wood. Cut all the young wood back to two or three eyes and set a stake beside it for protection. Use no manure or fertilizer when planting but wet the roots by dipping them into the water.

We present a list to select from of such varieties as we know will bear well and please

Prices	Each	Per 10.
1 year (except Green Mountain and Lutie).....	\$.15	\$1.00
2 year (except Green Mountain and Lutie).....	.20	1.50

Campbells Early (Black.)—Bunch large shouldered. Berry large, nearly round, covered with light blue bloom; adheres strongly to stem; skin does not crack, flesh somewhat pulpy, sweet, with slight aroma, not foxy; quality the same as Concord. It ripens very early; a fine shipping grape. Vine a good gower.

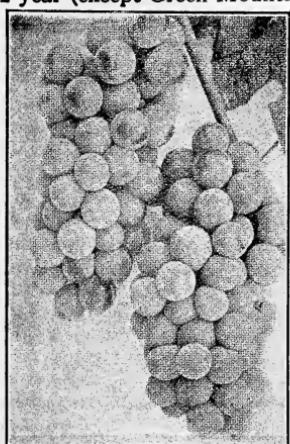

We have watched this grape for several years and have decided that it is the most profitable of the early grapes and we question whether there is any variety that will excel it. For New Jersey and Pennsylvania we most especially recommend it.

Catawba.—Dark red when fully ripe. Bunches large; berries medium to large, with rich flavor.

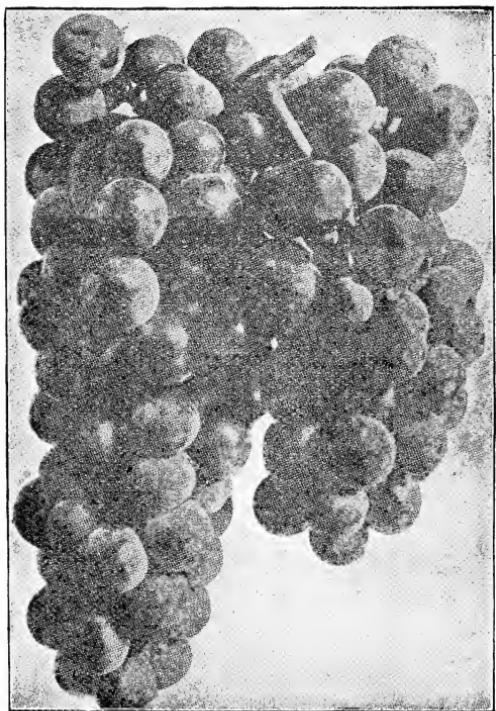

Clinton.—Bunches small and very compact; berries small; sprightly; when thoroughly ripe is a good table grape and keeps well; valuable for wine. A free, rapid grower and profuse bearer; ripens early and a good keeper.

Concord.—A well known large, purplish black grape, vines remarkably vigorous.

Price.—Extra 2 yr. olds, \$5.00; 1 yr., \$4 per 100.

Campbells Early

Brighton.

Price of Lutie.—1 year, 20c each; \$1.50 per 10; 2 year, 25c each; \$2.00 per 10.
Moore's Early.—Very early; bunches large, berry round and large, color black with a heavy blue bloom; of good quality.

Moore's Diamond.—White; bunch large, compact, shouldered; berries large, round, skin thick, firm, flesh tender; juicy, with but little pulp.

Niagara.—Bunch is very large and compact, sometimes shouldered; berries large; light greenish white; semi-transparent; skin thin, quality good.

Pocklington.—The fruit is a light golden yellow, juicy and sweet, bunches very large, sometimes shouldered; berries very large.

Salem.—Dark red; bunch large, compact, shouldered; berries large, round; flesh sweet, very tender, with a rich, aromatic flavor.

Vergennes.—Bunch medium size, berry large, medium, roundish, skin thick, red overspread with thick bloom, flesh quite pulpy, flavor pleasant, vine vigorous, hardy and productive.

Wyoming Red.—An early red grape. It ripens with Delaware; large bunch and berry, sweet and good.

Worden.—Black; bunch large, sometimes shouldered, compact; berries very large, skin thin. One of the best, if not the best.

Delaware.—Small, light red, skin thin, very juicy, sweet and sprightly; one of the finest flavored hardy grapes.

Eaton.—Very large and showy in both bunch and berry, black with a blue bloom, thick skin, flesh juicy and tender. Mid-season.

Agawam.—Red or amber color, bunch usually loose, shouldered, berries large, juicy, of a rich, aromatic flavor.

Brighton.—Berries medium to large, round, light red to dark crimson in color; flesh tender, sweet productive. Early.

Empire State.—Bunches large, shouldered; medium to large, roundish oval, color white; flesh tender, juicy, rich and sweet.

Green Mountain.—Clusters and berry medium, greenish white, thin skin, fine quality, tender, sweet, strong grower, exceedingly hardy. Very early.

Price.—1 year, 20c each; \$1.50 per 10.

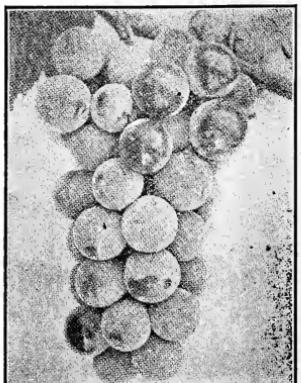

Lutie.—Earliest in the market; vines hardy; a strong grower; bunches solid, berries large; color light chocolate: flavor equal to Delaware; sweet and rich.

Moore's Early.—Very early; bunches large, berry round and large, color black with a heavy blue bloom; of good quality.

Moore's Diamond.—White; bunch large, compact, shouldered; berries large, round, skin thick, firm, flesh tender; juicy, with but little pulp.

Niagara.—Bunch is very large and compact, sometimes shouldered; berries large; light greenish white; semi-transparent; skin thin, quality good.

Pocklington.—The fruit is a light golden yellow, juicy and sweet, bunches very large, sometimes shouldered; berries very large.

Worden.

CURRANTS.

We have revised our list so that it includes the best only in each class.

Prices.—(Except Black Champion.)

	Per 10.	Per 100
1 year.....	\$.60	\$3.00
2 year.....	1.00	4.50

Wilder.—One of the strongest grower, and most productive. Bunch and berries very large, bright, attractive red color. Compared with the celebrated Fays, is equal in size, with longer bunch, better in quality, with much less acidity and fully as prolific.

Black Champion.—The finest black Currant ever exhibited. The bunches are very large, and the flavor of the fruit particularly delicious. It hangs long on the bushes, and unlike the other varieties, it will bear the severest pruning without detriment.

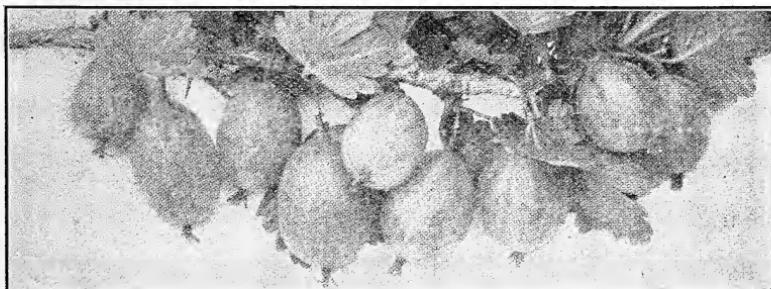

Price.—1 year, \$4.00 per 100.

Fays Prolific.—Color, rich, red. As compared with the Cherry Currant. Fays Prolific is equal in size, better flavor, with much less acid.

White Grape.—Very large, yellowish white, sweet or very mild acid, excellent quality and valuable for the table; the finest of the white sorts. Very productive.

Cherry.—Large, red; bunch long; of great beauty and excellent quality. One of the oldest and best.

GOOSEBERRIES.

Red Jacket

Prices—all varieties. Each. Per 10. Per 100.

2 year olds, No. 1.....	\$.15	\$ 1.25	\$ 8.00
2 year olds, No. 2.....	.10	.75	5.00

Columbus.—Fruit very large, green, inclined to straw color, of excellent flavor, carries well to market. Bloom is well protected by early foliage, making it one of the surest croppers. On account of its productiveness, we believe that every one of our patrons should have some.

Downing.—Very popular; large pale green, good quality; bush vigorous, hardy, prolific. The fruit hangs in thick close rows. It bears abundantly, is hardy, requires but little attention, continues for almost a life-time.

Pearl.—Best American variety; a cross between Houghton and a large English variety; very hardy, superior in size and quality and more productive than Downing; is likely to supersede this standard sort.

Red Jacket.—A true native and one of the finest of American Gooseberries; rivaling the largest English varieties in quality and size of berry; and excelling them by far in vigor of growth and freedom from mildew. The plant is of vigorous growth, with bright, clean foliage. It is very hardy and a wonderful cropper. The fruit is large, smooth, of a rich, ruby red and fine quality.

Downing.

RHUBARB OR PIE PLANT

Linneaus.—Large early, tender and fine. Strong, vigorous grower, producing extra large stalks of finest quality.

2 year.....	\$.75	\$5.00
1 year.....	.50	3.50

For garden culture, plant in beds two feet apart each way; for field culture, make five feet apart and plant two feet apart in rows. Set root six inches below the surface, covering but two inches deep at first, and filling in after the plant has pushed forth, by degrees, the first season as you continue to cultivate. The size and earliness are always proportionate to the amount of manure applied.

Early Argenteuil.—A French variety of mammoth size which has proved a money maker wherever tried. It is also a very early variety and a great yielder.

Barr's Mammoth.—A very superior variety, both as to size and quality, and have realized ten cents more for it per bunch than for Conover's.

Palmetto.—It is an improvement on Conover's in that it yields a much heavy-crop, fully as large and of much more even and regular size. It is fit for use nearly a week before Conover's. best variety for all purposes.

Palmetto.

ORNAMENTAL TREES.

American White Ash.—A native tree of quick growth, with massive trunk and broad spreading limbs, valuable for shade and street planting.

Price.—4 to 5 feet, 50c each; \$4.00 per 10.

European Mountain Ash.—A fine hardy tree with a dense head, of very attractive compound of leaves. Bears white flowers in May and is covered with showy clusters of red berries from July to frost.

Price.—4 to 5 feet, 60c each; \$5.00 per 10.

Purple Beech, Rivers Grafted.—This variety differs from the ordinary Purple Beech by its compact symmetrical growth and crimson foliage in early Spring, changing to a dark purple in summer. It is the finest of all purple leaved trees. Our stock is exceptionally fine.

Price.—6 feet, \$1.50 each.

Cut-leaved Weeping Birch.—

Beyond question one of the most popular of all weeping or pendulous trees. Its tall, slender, yet vigorous growth, graceful drooping branches, silvery-white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Price.—6 to 7 feet, \$1.50 each.

Catalpa Bungeii. (Umbrella Tree, Japan.)—One of the most attractive of trees which, when better known, will certainly be in great demand for lawns and all ornamental grounds. It forms a perfect half-globular or umbrella head, with foliage of a deep green color, laid with great precision and making a beautiful roof of leaves upon which the light plays with delightful effect, making it one of the finest trees that can be planted on a lawn or for a shade tree.

Price.—Extra large heads and straight stems, \$1.25 each.

Catalpa Speciosa.—Very rapid growers. Large heartshaped, downy, leaves compound panicles of white flowers, tinged with violet and dotted with purple and yellow.

Price.—6 feet, 50c each; \$4.00 per 10.

Red Flowering Dogwood.—A rare specimen of the common White Dogwood which it resembles except in flowers, which are of a beautiful shade of pink.

Price.—2 feet, \$2.00 each—very scarce.

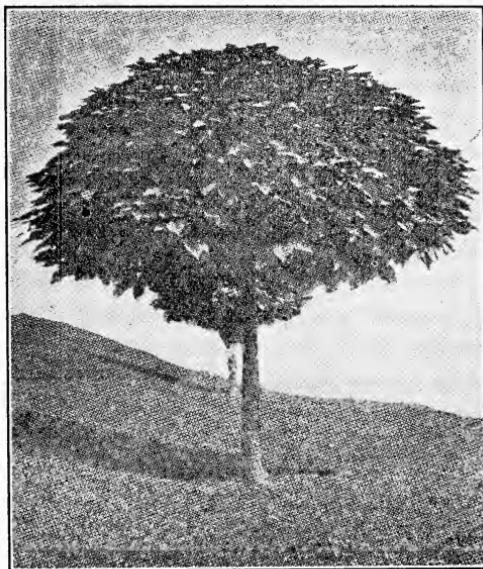

DWARF NORWAY MAPLE.

We are offering the prettiest and most satisfactory tree ever yet offered to the owners of small lawns. In general appearance it is identical to a small well headed Norway Maple without any stem. The foliage is almost as large as those of the tree form and as dark and beautiful. Its shape is pyramidal, symmetrical and compact. It grows very slowly but every terminal makes a growth of an inch or so from which it throws out a great bunch of glossy leathery leaves hiding every branch from view. No other tree is so well adapted to the small lawn or to places in the large lawn where small shapely trees are needed. Other trees either become too large after a few years or require too much attention to keep them in shape.

It has taken many years to get our present stock. Every specimen is a good one and if you plant it in fairly good ground that is not beneath the branches of some large tree it will not need any more attention and will always be a thing of beauty. We guarantee it to give satisfaction and please you.

Prices. 4 to 5 feet high and 3 feet across, \$2.00 each; \$3.00 per pair.

3 to 4 feet high and 2 1-2 feet across, \$1.50 each; \$2.25 per pair.

Schwedlers Maple.—A beautiful variety, with young shoots and leaves of a bright purplish and crimson color, which changes to a purplish green. One of the most valuable trees of recent introduction.

Price.—8 feet, \$1.00 each; \$8.00 per 10. Very fine stock.

Sugar Maple. (Rock Maple.)—A well known native tree of elegant pyramidal form. Its stately growth, fine form and foliage make it desirable as an ornamental and shade tree. Especially valuable as an avenue tree.

Prices.—8 to 10 feet, \$1.00 each; 10 to 12 feet, \$3.00 each; 12 to 14 feet, \$4.00

Norway Maple.—A large handsome tree of spreading rounded form, with broad, deep green, shining foliage. Its compact habit, and strong vigorous growth render it one of the most desirable species for the street, park or garden.

Prices.—6 to 7 feet, 35c each; \$3.50 per 10; \$25.00 per 100.

7 to 8 feet, 50c each; \$4.00 per 10; \$35.00 per 100.

8 to 9 feet, \$1.00 each; \$10.00 per 10.

10 feet, \$2.00 each.

Elm, American.—A noble tree, of strong rapid growth; lofty, sweeping branches of great elegance and grace, The finest of all shade trees. Suitable for street or lawn planting.

Price.—6 feet, 60c each; \$4.00 per 10.

Horse Chestnut, White Flowering.—A very beautiful, well known tree, with round dense head, dark green foliage and an abundance of showy white flowers in the early spring.

Price.—5 feet, 75c each.

Horse Chestnut, Red Flowering.—Identical in growth to the white flowering with flowers and buds of showy red. Blooms a little later than the white flowering.

Price.—5 feet, \$1.00 each.

Oriental Plane.—A popular shade tree in Europe. Does well for a similar purpose here. Not subject to blight like the native Sycamore. Makes a large spreading tree. Rapid grower. Succeeds well in either high or low situations.

Prices.—6 feet, 25c each; \$2.00 per 10.

6 to 7 feet, 35c each; \$3.00 per 10.

7 to 8 feet, 50c each; \$4.00 per 10.

8 feet, 75c each; \$6.00 per 10.

Carolina Poplar—A handsome formed, rapid growing tree, with angular branches, angles forming whitish lines which persist even after the tree has attained its growth; trunk furrowed even in old age.

Price.—7 feet, 30c each; \$2.50 per 10.

Lombardy Poplar.—Attains a height of from 100 to 150 feet. Well known and remarkable for its erect, rapid growth, and tall, spiry form. Indispensable in landscape gardening, to break the ordinary and monotonous outlines of most other trees.

Price.—6 to 7 feet, 60c each; \$5.00 per 10.

Weeping Willow.—This is the well known Weeping Willow, whose long pendulous branches droop so gracefully and sway so gracefully. A splendid shade tree that does well on wet or dry ground.

Prices.—4 feet, 35c each; \$3.00 per 10.

MAGNOLIAS.

Magnolia Conspicua. (Chinese White.)—Low tree, the flowers of which appear before the leaves. This variety is covered in May with masses of snow-white lily like flowers.

Prices.—Balled, 2 1-2 feet, \$2.00 each. 3 to 4 feet, \$3.00 each.

Magnolia Soulangeana. — In habit it closely resembles Conspicua, shrubby and branching while young, but becoming a fair sized tree. Flowers white and purple, cup-shaped, 3 to 5 inches in diameter.

Prices.—Balled, 4 feet, \$2.00 each. 5 to 6 feet, \$3.00 each.

M. Soulangeana Nigra. — A very rare variety of vigorous and robust growth; flowers large, very dark, velvety purple, almost black; a free bloomer; a most beautiful and desirable variety. Distinct from any other sort.

Price.—2 feet, \$2.00 each.

M. Stellata. ((Halleana.) —Starry Magnolia. Of dwarf habit. Flowers semi-double, pure white and fragrant. Blooms two weeks earlier than other magnolias.

Price.—2 feet, \$2.00 each.

Magnolia Lennei.—A beautiful symmetrical tree, of extreme hardness, blooming just after the Soulangeana. Flowers are very dark purple, of fine shape and form.

Price.—Balled, 2 to 3 ft., \$2 each.

Teas Weeping Mulberry.—A beautiful and hardy Weeping Mulberry. Forms a perfect umbrella-shaped head, with long, slender, willowy, branches drooping to the ground. Most desirable for ornamental lawns, parks, or for cemetery planting. Strong trees, budded on 5 to 7 feet stems.

Prices.—3 year heads extra strong stems, \$1.35 each; \$12.50 per 10.

Globe Headed Mulberry.—A new variety. A very hardy tree with a beautiful round head growing from the top of straight body.

Price.—Good heads, \$2.50 each.

HARDY SHRUBS.

Hydrangea Paniculata Grandiflora.—A fine shrub growing from 6 to 8 feet high but can be kept pruned to a low bush. Very showy from July to September with white flowers changing late in the season to tints of pink and red. The most popular and finest of all the well known shrubs.

Prices.—extra fine transplanted with a mass of roots.

12 to 18 inches, 15c each; \$1.25 per 10.

18 to 24 inches, 20c each; \$1.50 per 10.

2 to 3 feet, 25c each; \$2.25 per 10.

Tree form good heads 2 foot stem, 50c each.

Hydrangea Arborescens Grandiflora Alba.—The blooms are of very large size, of pure snow-white color, and the foliage is finely finished. One of its most valuable characteristics is its coming into bloom just after the passing of all the early Spring shrubs, with a long season of bloom, from early June through August, perfectly hardy.

Prices.—Good strong crowns, 30c each; \$2.50 per 10.

Japan Snow Ball.—Has a very rich, deep green foliage, of handsome form and beautiful globular heads of pure white flowers, quite distinct from those of the common sort. One of the best ornamental shrubs.

Prices.—2 feet, 25c each; \$2.00 per 10.

3 feet, 35c each; \$3.00 per 10.

ASSORTED HARDY SHRUBS

Prices.—(except where otherwise marked.)

Extra fine transplanted, 25c each; \$2.00 per 10.

Althea, Variegated Leaf.—A conspicuous variety, with foliage finely marked with light yellow. Flowers double purple. One of the most valuable variegated leaved shrubs.

Bignonia Grandiflora.—Trumpet flower, 3 to 4 feet.

Calycanthus.—Sweet shrub, 3 to 4 feet.

Deutzia Gracilis.—Graceful, white flowering.

Deutzia Rosea.—Pink, low and handsome. 3 feet.

Deutzia Pride of Rochester.—Profuse bloomer, double white, 3 to 4 feet.

Forsythia Virridissima.—A fine hardy shrub, bright yellow flowers, blooms early; 2 to 4 feet.

Honeysuckle. (Upright.)—We have this in red and white varieties. Very sweet flowers and red fruit. 2 to 3 ft.

Common Lilac.—The common purple species; a strong grower and one of the best.

Common White Lilac.—Flowers pure white.

Philadelphus Coronarius.—Mock Orange, 3 to 4 feet.

Spiraea Anthony Waterer.—Dwarf, constant bloomer, 2 year.

Spiraea Callosa Froebeli.—Dwarf, rosy flowers, 3 to 4 feet.

Spiraea Reevesii.—Tall, white clusters, 3 to 4 feet.

Stephanandra Flexuosa.—White flowers in great profusion, 3 to 4 feet.

Tamarix Estivalis.—New, light rosy carmine flowers, foliage resembles an evergreen and is very attractive.

Weigela Rosea.—Rose colored flowers, 3 to 4 feet.

Weigela Eva Rathke.—New, free bloomer, reddish Purple, 3 to 4 feet.

Weigela Candida.—Pure white, 3 to 4 feet.

JAPAN MAPLES

The Japan Maples are becoming more and more popular as they become better known. Their chief beauty and recommendation is their dwarf habit and attractive appearance. Some of them have foliage of medium size and rich bright hues, while that of others is deeply cut and of peculiar form. Planted singly they are effective but in groups they are remarkably attractive the year round.

We are offering them at exceptionally low rates as they have always been held by others at from \$2.00 to \$3.00 each.

Atropurpureum.—A bushy shrub, foliage dark purple and deeply cut, very ornamental, the hardiest and one of the choicest small trees or shrubs offered.

Atropurpureum Dissectum.—Striking and handsome, dwarf and weeping, leaves beautiful rose when young, changing to a deep and constant maroon, deeply and delicately cut and having the appearance of an elegant out-door fern.

Oshiu-Beni.—Coloring very much like Atropurpureum, but with smaller and more deeply cut leaves. Nine lobes, widely separated, tree of a dwarf and weeping habit.

Prices.—Fine selected specimens with balls of dirt. 3 feet, \$1.50 each; 2 to 3 feet, \$1.25 each.

HEDGING.

California Privet.—The best known and most popular hedge plant and one that it will be hard to supplant.

It is a vigorous grower everywhere and even in cities where nothing else will survive it stands up well and for seashore planting it has no competitor at all. An exceedingly beautiful shrub. Very vigorous and hardy; form, pyramidal; foliage, deep green, bright and glossy. Decidedly the finest and best of all plants for forming an ornamental hedge, its foliage being so abundant as to produce a wall of the deepest, richest green imaginable. It is almost an evergreen, the leaves remaining on the branches nearly all winter. Insects never attack it, and it never grows dull, but holds its beautiful green foliage throughout the season.

	Per 10.	Per 100.	Per 1000

American Arbor Vitae.—One of the most desirable evergreen hedge plants; best adapted for screens or wind-breaks.

Prices.—12 inches, \$1.00 per 10; \$5.00 per 100; 18 inches, \$1.50 per 10; \$10 per 100

Norway Spruce.—When sheared the most compact screen and wind-break of all the evergreens. These were all root pruned last spring.

Prices.—15 to 18 inches, \$1.25 per 10; \$6.00 per 100; 3 to 4 feet, \$2.50 per 10; \$22.50 per 100. 3 to 4 feet, \$4.00 per 10; \$35.00 per 100. 4 to 5 feet, \$6.00 per 10.

Berberis Thunbergii.—One of the most effective plants in autumn, after most other deciduous shrubs are bare. Its small oval leaves then assume superb crimson

Berberis Thunbergii.

hues, and the slender branches droop beneath their load of bright red berries, which hang on until late in winter; new and desirable.

Prices.—
12 to 15 inches, 15c each, \$1.00 per 10; \$6.00 per 100.
15 to 18 in., 20c each; \$1.50 per 10; \$10 per 100.

EVERBLOOMING ROSES.

We are listing only such varieties as we know will succeed in the garden with the Hybrid Teas in predominance. This is because of their beauty of form and constant blooming.

The roses offered are strong stock on their own roots with from 15 to 20 inch tops that are dormant. Every plant with proper care will produce a fine lot of bloom the first year planted.

Prices.—Extra strong Dormant outdoor grown plants., 18 to 24 inch, 30c each; \$2.50 per 10.

Antoine Rivoire. (H. T.)—A new rose of much merit and value for garden culture; a handsome, clean and vigorous grower and profuse bloomer. Color, rosy-flesh and ivory, on a yellow ground, often shaded with a border of carmine; flowers of extra large size, delicately formed and moulded and open in the most charming manner, petals reflexing and rolling back not unlike a Carmelia blossom.

Bessie Brown. (H. T.)—This is a prime, new rose which pleases us extremely, and, in fact, everyone who has seen it in bloom. Of strong, upright growth, good foliage, and one of the heaviest bloomers. Color, white, tinged flesh; flower very large, —extremely full and double, of greatest substance and fragrant.

Climbing American Beauty. (H. T.)—This is no ordinary climbing rose but is a vigorous, climbing type of the real American Beauty. Immense blooms, measuring 3 to 4 inches in diameter, are each born on a long separate stem. The color is a glowing crimson red, the real American Beauty color. It has a tough beautiful glossy green foliage and retains its brightness during the entire season. Is absolutely hardy in temperatures down to 10 to 20 degrees below zero.

We sell it in assorted orders at the same price as others, but when ordered alone it will be at 40c each; \$3.00 per 10.

Etoile de France. (Star of France.) (H. T.)—A brilliant shade of clear red crimson velvet, centering to vivid cerise; large flowers on long, stiff stem; remarkably vigorous, free blooming and hardy.

Frau Karl Druschki. (H. T.) (The White American Beauty or Snow Queen.)—An everywhere hardy, vigorous grower, with bright green leaves, delicately veined; splendid long buds and magnificent snow-white blooms with large saucer-shaped petals. Flowers very large, deep, full, of exquisite white. Rightly named and deservedly a prize winner. Producing beautiful flowers when many sorts are doing nothing.

Helen Cambier. (H. T.)—Hardy and a continuous free bloomer; flowers of good size; of splendid substance and lasting; color, copper-yellow to deep amber-yellow, changing to lemon yellow in outer petals, making a pretty and striking combination. A splendid garden sort.

Kaiserin Augusta Victoria. (H. T.)—The greatest hardy, white Hybrid Tea Rose in existence. A strong, sturdy grower; free-flowering; it has become the most popular of all white roses for general planting. Blooms continuously from early spring until late fall, with pointed buds, the large double flowers are glorious in their perfection; borne on long, stiff stems; delicate pure white, deliciously fragrant. Unexcelled for cutting; absolutely hardy. Although grown extensively under glass, it is essentially a garden rose. There is nothing finer than this glorious rose.

Madame Jenny Gillemot. (H. T.)—One of the most graceful and charming things in the nursery; of nice growth; upright in habit; foliage bright and clean; a prolific bloomer; color, deep saffron-yellow with golden shadings; buds most beautifully formed and moulded and petals of the most exquisite texture; moderately full and superb both in bud and open flower.

Meteor. (H. T.)—One of the brightest colored and most brilliant roses we have, and is highly recommended for bedding and general planting, as well as for growing in pots and conservatories. The color is rich, velvety crimson, exceedingly bright and striking; both buds and flowers are large, elegantly formed, full double, and borne on nice long stems. Vigorous and healthy; a constant bloomer; moderately hardy.

Mrs. Robert Peary. (H. T.) (Climbing Kaiserin.)—A very strong, thrifty grower, unusually pretty foliage, and the flowers produced on stout, long stems. Although a Hybrid Tea, it is one of the best bloomers we know of for the entire year and will produce more flowers than many of the Teas or Noisettes. The flowers are identical in every way with its parents, Kaiserin Augusta Victoria. The flowers are perfect shape, size, substance, fragrance, lasting qualities and fullness of flower.

Wellesley. (H. T.)—A seedling from Liberty crossed with Bridesmaid. We place it among our best Hybrid Teas. Of good growth, upright, clean; flowers borne on good stems; a free bloomer, flowers large, of great substance, and buds beautifully formed, opening to a grand full rose of silvery-pink color and hard to beat.

TRUE CLIMBERS OR RAMBLERS

They are suitable for arbors, screens and sides of buildings and over fences. Fine Field-Grown Plants, 2 feet and up. One of each of the six kinds for \$1.20.

Dr. W. Van Fleet.—The new climber of exceptional merit. A splendid robust climber with most beautiful foliage, immune from mildew. It is a most profuse bloomer, beginning with the hybrid teas and continuing to give fresh bloom every day for two or three weeks. No description can justly tell of the delicate texture, exquisite coloring and delicious perfume, nor can any picture do justice to its beautiful form. Buds most beautifully formed and are full and compact. In color it is a delicate rosy flesh shading in the center to a pretty rosy pink. Flowers produced on splendid stems. **Price.**—30c each.

Philadelphia Rambler.—This variety is identical in all respects to the Crimson Rambler, except in color, which is a deeper, brighter and more intense crimson.

Price.—25c each.

Crimson Rambler.—Free flowering, glowing crimson, bright and vivid in color.

Price.—25c each.

Dorothy Perkins.—A climbing rose, resembling the Crimson Rambler, but of a beautiful shell pink, full and double, and of an unusually large size.

Price.—25c each; 6 for \$1.00.

Excelsa. (Red Dorothy Perkins.)—Intense crimson-scarlet; double flowers in brilliant clusters set in glossy, shining foliage which never mildews nor spots. An intensified Crimson Rambler, which it promises to displace. Extremely vigorous and the handsomest of all the red climbers. **Price.**—25c each.

Gardenia.—Strong grower, produces flowers singly on stems one-half to one foot long. Flowers in bud bright yellow; when open, cream color, very fragrant. Extra good.

Price.—25c each.

HARDY VINES AND CREEPERS

Wisteria Sinensis.—It grows very rapidly and blooms profusely. The flowers are a beautiful shade of blue, hanging on graceful pendulous clusters.

Price.—25c.

Wisteria Magnifica.—Flowers in dense, drooping racemes, of the same size as the Chinese, and of a pale lilac color; vigorous and perfectly hardy.

Price.—25c each.

Ampelopsis Veitchii.—(Japan or Boston Ivy.)—This is one of the finest climbers for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with long overlapping leaves which form a perfect mass of foliage.

Price.—15c each; \$1.00 per 10; \$3.00 per 100.

Clematis Paniculata.—It grows and thrives anywhere and is a very rapid grower and profuse bloomer. The flowers are pure white, borne in large clusters, converting the plant into a perfect mass of white.

Price.—25c each; 5 for \$1.00.

Irish Ivy. (English Ivy.)—Evergreen, 25c each.

CLEMATIS

(Hardy Hybrid Large Flowering.)—These beautiful and attractive vines cannot be excelled when brilliant color effects are desired. They are invaluable for porch and trellis.

Price.—One of each kind, \$1.00.

Jackmani.—Very popular; intense violet color, at 40c each, by express.

Madame Edouard Andre.—Flowers large, of a beautiful bright velvety red, very free-flowering, and a continuous bloomer.

Price.—40c each, by express.

Henryi.—The most popular of all white varieties, at 40c each, by express.

Wisteria.

RHODODENDRONS.

The **Rhododendron** is the showiest and most magnificent hardy evergreen shrub that grows. In early summer there are no flowers more gorgeous than these. They are simply a solid mass of rich colored bloom.

When massed or grouped they impart a distinguished look to any place. They are beautiful not only during blossoming time but their grand foliage of dark glossy green is admired during the summer and in winter which gives a beautiful tone to the general effect.

They will do well in any moist soils free from limestone. The ground should be dug to a depth of two feet or more and mixed with one third well rotted manure. Keep the top soil loose and well mulched and during dry weather water should be applied to get the best results. Use no lime or limed soil.

We import our stock from England. We find that they do better than Holland grown. The varieties are selected because of their foliage and number of buds and general form of plant from the hardiest of the best Hardy Hybrids.

EVERY PLANT WILL BLOOM this spring, and is a perfect specimen.

Varieties—

Album Elegans.—Blush changing to white.

Album Grandiflorum.—Blush, fine truss and foliage.

Album Novum.—White.

Caracatus.—Red Purplish Crimson, one of the finest.

Chas. Dickens.—Dark Scarlet.

Delicatissimum.—Blush White.

Everestianum.—Rosy Lilac, abundant bloomer.

Lady Armstrong.—Pale rose, spotted.

Mrs. A. Hunnewell.—Pink, primrose center.

Mrs. C. Thorold.—Bright pink, yellow center.

Sefton.—Dark Maroon, one of the finest.

Prices.—Grafted, 15 to 20 buds, packed with ball of earth 2 to 2 1-2 feet, \$1.50 each; \$12.00 per 10.

AZALEA.

Azalea Amoena.—A bushy, dwarf evergreen with small green leaves, very attractive at all seasons but while completely covered with a mass of brilliant claret colored flowers for three or four weeks in April and May these little plants are the most beautiful things imaginable.

Prices.—12 to 15 inches, very bushy, \$1.00 each. Transplanted last year.

Azalea Hinodegiri.—An improvement on Amoena, it being a more vigorous grower with larger leaves bearing a great mass of carmine flowers.

Price.—\$1.50 each for balled plants.

Azalea Mollis.—A hardy species of deciduous Azalea bearing large and showy yellow and red flowers of various shades in fine trusses.

Price.—6 to 12 inches, 50c each; \$4.00 per 100.

HARDY PRIVET BAY.

Every one would like to own Bay Trees but they are not hardy and are so expensive in the beginning and continue to be because of greenhouse storage costs that but few people feel that they can afford them. We have a splendid substitute in these Privet Balls and Standards at very moderate prices. Boxed, they are fine for lawns and porches.

Prices.—Balls 18 inches, extra fine, at \$1.25 each; \$2.00 per pair.

Balls 15 inches, extra fine, at 75c each; \$1.25 per pair.

Balls 12 inches, extra fine, at 60c each; \$1.00 per pair.

Standards.—4 to 5 feet stems, fine heads, at \$1.25 each; \$2.00 per pair.

3 to 4 feet stems, good heads, 75c each; \$1.25 per pair.

EVERGREENS.

Abies Concolor—(Silver Fir.) Without doubt the finest of the Rocky Mountain evergreens. Even the Blue Spruce does not excel this magnificent tree. Tree is of graceful habit and rapid growth. Broad handsome foliage, blue above and silvery beneath. Transplanted.

Prices.—Fine specimens balled, 3 feet, \$2.00 each.

15 to 18 in., balled, 60c each.

Abies Nordmanni. (Nordmans Fir.)—Thick, dense tree of fine proportions. The needles are wide, dark green and lustrous, with a silvery under surface that sparkles in the sun. This is one of the prettiest and best evergreens. We endorse it fully as the most striking tree in our collection. Root pruned.

Price.—Fine specimens, 4 ft. very broad, balled, \$2.00 each.

American Arbor Vitae.—It is very hardy and easily transplanted, few or no plants ever failing if properly trained specimens are obtained. It forms a most desirable and ornamental screen to divide a lawn from other parts of the ground, or for any other purpose.

Prices.—15 inches transplanted, 25c each; \$2.00 per 10.

Biota Aurea Nana.—(Berckmans Golden Arborvitae.)—A new variety of very dwarf and compact habit; a perfect gem for small gardens or cemetery lots. It far surpasses the old Biota Aurea where a very dwarf tree is desired. The plant is very effective for window boxes and for tubs in exposed places, where it is too cold for palms and other decorative plants.

Price.—12 to 15 inches, extra fine, balled, \$1.25; 2 feet, \$2.00 each.

Mugho Pine. (Pinus Mughus.)—This dwarf species from a dark, dome-shaped bush, broader than its height and sometimes almost prostrate. Valuable for lawns, terraces, barren hillsides or near the seas.

Price.—15 to 18 inches, \$2.00 each.

Juniper Virginiana Glauca.—A fine pyramidal tree of very graceful habit, with beautiful blue glaucous foliage that attracts attention very favorably.

Price.—Balled, 2 ft., very fine, 75c each; 5 feet, balled, \$1.50 each.

Retinospora Squarrosa Veitchii.—The foliage is feathery of a rich silvery steel blue. One of the most showy and attractive trees for grouping with other colors. The branches are of a drooping habit. Can be trimmed any shape.

Price.—2 ft., balled, fine stock, \$1.25 each. 10 to 12 inches, balled, 40c each.

Kosters Colorado Blue Spruce.—A rare elegant tree with foliage of a rich blue. One of the most distinct and striking of all the Spruce family. A free grower and perfectly hardy. The finest of all blue evergreens, selected from the Colorado Blues, of extra fine color and compact free growth.

Prices.—2 to 2 1-2 feet, balled, \$2.00; 18 to 24 inches, \$1.75 each.. 15 to 20 inches, balled, \$1.50.

12 to 15 inches, balled, \$1.00.

Hemlock Spruce. (Tsuga Canadensis.)—One of the most beautiful evergreen trees, with gracefully drooping branches. There is nothing prettier for hedges or well trimmed specimen trees for lawns. Somewhat pendulous and delicate in appearance; foliage light, yet tufted, form conical. All transplanted last year.

Prices.—3 feet, 75c each; \$6.00 per 10. 2 feet, 50c each; \$4.00 per 10.

4 ft., \$1.00 each; \$8.00 per 10.

18 inches, extra fine, transplanted, 35c each; \$3.00 per 10.

Kosters Colorado Blue Spruce

Retinospora Plumosa Aurea.—This variety is one of the handsomest of the genus. It is entirely hardy, of rapid growth, its branches tipped with bright, golden colored foliage retained throughout the year. When properly pruned there is scarcely a green leaf visible. The foliage is exceedingly fine and soft, resembling, as its name, implies a golden plume.

Price.—15 inches, balled, 50c each; 18 in., 75c each.

Norway Spruce.—(*Picea Excelsa*)—A well known and valuable spruce, extremely hardy, and a rapid grower that does well everywhere. It is a very valuable evergreen, either as specimens or for hedges, growing as a very graceful pyramidal tree when planted alone and as sheared hedge becomes absolutely impenetrable. All stock had roots pruned last spring.

Prices.—4 to 5 feet, 75c each; \$6.00 per 10.
3 to 4 feet, 50c each; \$4.00 per 10.
2 to 3 feet, 35c each; \$2.50 per 10.
18 to 24 inches, 25c each; \$2.00 per 10.

The first two sizes balled at 10c each extra. The 2 to 3 feet balled at 5c each extra.

Cupressus Lawsoniana.—(*Triomphæ de Boskoop*)—One of the most beautiful of all Conifers. A graceful pyramidal tree of vigorous growth and dense, elegant habit. The branches are frond-like in arrangement, and drop gracefully at the tips. The color is an unusually rich dark green, retained all the year. Forms beautiful specimens.

Prices.—2 to 2 1-2 feet, fine balled stock, \$1.00 each.

Retinospora Ovata Nana.—A slow growing dwarf variety of extreme hardiness. The deep green masses of flattened leaves rising one layer above another makes a dense heavy foliage and gives a most pleasing effect. All transplanted last year.

Prices.—14 inches balled fine, \$1.50; 12 inches, balled, fine, \$1.00.

FIELD CORN.—BLACK'S EARLY

We have a first-class Seed Corn that is noted in this neighborhood for its small cob and for its early maturity. In 1907 we planted at our usual time, which is about June 1st to the 15th, and yet we had all our corn cut up before the first exceptionally early frost came, and it was then ready to cut. It was the wonder of the neighborhood and has attracted attention for years.

It is a cross between a yellow flint and a white dent corn and the result is a pale yellow corn with a very small cob and large, deep grains.

Prices.—By mail, postpaid, 30c per quart.

By freight or express, 50c per peck, \$1.60 per bushel.

NOTICE.—All claims for defective stock must be made at once upon the receipt of the same.

Address all orders and communications to:

JOS. H. BLACK, SON & CO., **Hightstown, N. J.**

Lock Number 52.

NEW JERSEY STATE BOARD OF AGRICULTURE

No. 124, 1915.

OFFICE OF THE STATE ENTOMOLOGIST.

New Brunswick, N. J., Sept. 5, 1915.

I wish to certify that I have this 5th day of September, 1915, inspected the general nursery stock growing in the Village Nurseries, Jos. H. Black, Son & Co., proprietors, of Hightstown, Mercer County, New Jersey, and have found the same apparently free from San Jose Scale and other dangerously injurious insect pests; also that the stock seemed healthy.

I further certify that the nursery has a properly constructed house, 12x13x20 feet, for fumigating with hydrocyanic acid gas, upon which I have marked the quantity of cyanide of potassium required for an effective charge.

This certificate expires June 1st, 1916, and covers only stock actually on the nursery when examined.

THOS. J. HEADLEE,

State Entomologist.

Our offer by PARCEL POST

We Can Ship Stock Any Time Between October 26th and May 15th.

**All Stock will be Carefully Selected, Well Rooted
Carefully Packed, and Postage Paid.**

We Can Send ONLY the Following by PARCEL POST.

Try some of these small plants and trees.

The roses are particularly fine and are not little potted plants. They are all outdoor grown, 2 years old.
